Thank you to Michael Fisher for his superb copyediting work and Neil Weinberg for his excellent interior graphic design and layout.

We are very grateful to Kamal Kamaoui and the World Economic Forum's Publications team for their invaluable collaboration on the production of this report.

The terms country and nation as used in this report do not in all cases refer to a territorial entity that is a state as understood by international law and practice. The term covers well-defined, geographically self-contained economic areas that may not be states but for which statistical data are maintained on a separate and independent basis.

Preface

KLAUS SCHWAB

Executive Chairman, World Economic Forum

The key for the future of any country and any institution is the capability to develop, retain and attract the best talent. Women make up one half of the world's human capital. Empowering and educating girls and women and leveraging their talent and leadership fully in the global economy, politics and society are thus fundamental elements of succeeding and prospering in an ever more competitive world. In particular, with talent shortages projected to become more severe in much of the developed and developing world, maximizing access to female talent is a strategic imperative for business. The World Economic Forum has been among the institutions at the forefront of engaging leaders to close global gender gaps as a key element of our mission to improve the state of the world.

Through the *Global Gender Gap Report* series, the World Economic Forum has been quantifying the magnitude of gender-based disparities and tracking their progress over time. By providing a comprehensive framework for benchmarking global gender gaps, the *Report* reveals those countries that are role models in dividing their resources equitably between women and men, regardless of the overall level of those resources. In 2008, based on the findings of the *Report*, we launched the Global Gender Parity Group, a multi-stakeholder community of highly influential leaders—50% women and 50% men— that have together committed to strategies to improve the use of female talent. In March 2012, based on the work of this group and to complement the gap analysis in the *Report*, we released an online repository of information on company best practices that can help close economic participation gaps. Over the course of this year, using the data from the *Report* to provide the context, we also launched three pilot Gender Parity Taskforces in Mexico, Turkey and Japan to foster public-private collaboration on closing the economic participation gender gap by up to 10% in each country. Outside of the World Economic Forum, the *Report* is used widely by numerous universities, schools, researchers, media entities, businesses, governments and individuals as a tool for their work.

We would like to express our deep appreciation to Ricardo Hausmann, Director, Center for International Development, Harvard University, USA; Laura D. Tyson, S.K. and Angela Chan Professor of Global Management, Haas School of Business, University of California, Berkeley, USA; and Saadia Zahidi, Senior Director and Yasmina Bekhouche, Project Manager, World Economic Forum, for their invaluable contributions to

this *Report*. We would also like to thank Annabel Guinault, Charlotte Harding and Silvia Magnoni for their support of this project at the World Economic Forum. Finally, we are grateful to the Community Partners of the Women Leaders and Gender Parity Programme for their unflagging support and commitment to closing gender gaps.

We are proud of the initiatives undertaken at the World Economic Forum and elsewhere on the basis of this *Report* since its first publication in 2006. It is our hope that this latest edition will continue to inspire further research, policy changes and new projects by business, governments, civil society and universities, and serve as a call to action to transform the pace of change on an issue that is fundamental to the growth and stability of the global economy and society.

Part 1

Measuring the Global Gender Gap

The Global Gender Gap Index 2012

RICARDO HAUSMANN, Harvard University

LAURA D. TYSON, University of California, Berkeley

YASMINA BEKHOUCHE, World Economic Forum

SAADIA ZAHIDI, World Economic Forum

The Global Gender Gap Index,¹ introduced by the World Economic Forum in 2006, is a framework for capturing the magnitude and scope of gender-based disparities and tracking their progress. The Index benchmarks national gender gaps on economic, political, education and health criteria, and provides country rankings that allow for effective comparisons across regions and income groups, and over time. The rankings are designed to create greater awareness among a global audience of the challenges posed by gender gaps and the opportunities created by reducing them. The methodology and quantitative analysis behind the rankings are intended to serve as a basis for designing effective measures for reducing gender gaps.

The first part of Part 1 reviews the underlying concepts employed in creating the Global Gender Gap Index and outlines the methods used to calculate it. The second part presents the 2012 rankings, global patterns and regional performances and calls attention to notable country cases. Next, we provide an overview of the links between gender gaps and the economic performance of countries. In the fourth part, we include information on the trends revealed by the Index in the six years that we have been producing it.

The Country Profiles contained in Part 2 of this *Report* give a more detailed picture of the relative strengths and weaknesses of each country's performance compared with that of other nations. The first page of each profile contains detailed information on the country's performance in 2012. The second page shows the trends between 2006 and 2012 on the overall Index and four Subindexes, as well as over 30 gender-related variables that reflect some of the legal and social factors that affect gender disparity in each country.

MEASURING THE GLOBAL GENDER GAP

Three underlying concepts

There are three basic concepts underlying the Global Gender Gap Index. First, it focuses on measuring gaps rather than levels. Second, it captures gaps in outcome

variables rather than gaps in means or input variables.

Third, it ranks countries according to gender equality rather than women's empowerment. These three concepts are briefly outlined below. For a description of how these concepts are captured by the construction techniques used in the creation of the Index, please see the section below, *Construction of the Index*.

Gaps vs. levels

The Index is designed to measure gender-based gaps in access to resources and opportunities in individual countries rather than the actual levels of the available resources and opportunities in those countries. We do this in order to make the Global Gender Gap Index independent from the countries' levels of development. In other words, the Index is constructed to rank countries on their gender gaps not on their development level. For example, rich countries, generally speaking, are able to offer more education and health opportunities to all members of society, which is often reflected in measures of education levels (although this is quite independent of the gender-related issues faced by each country at its own level of income). The Global Gender Gap Index, however, rewards countries for smaller gaps in access to these resources, regardless of the overall level of resources. Thus, the Index penalizes or rewards countries based on the size of the gap between male and female enrolment rates, but not for the overall levels of education in the country.

Outcomes vs. means

The second basic concept underlying the Global Gender Gap Index is that it evaluates countries based on outcomes rather than inputs. Our aim is to provide a snapshot of where men and women stand with regard to some fundamental outcome variables related to basic rights such as health, education, economic participation and political empowerment. Variables related to country-specific policies, culture or customs—factors that we consider to be “input” or “means” variables—are not included in the Index,

The Global Gender Gap Index, co-authored by Fiona Greig, Ricardo Hausmann, Laura D. Tyson and Saadia Zahidi, was first introduced in the World Economic Forum's *Global Gender Gap Report 2006*. The authors are deeply grateful to Silvia Magnoni and Marc Cuenod for their excellent support in the production of this year's Part 1.

but they are displayed in the Country Profiles. For example, the Index includes a variable comparing the gap between men and women in high-skilled jobs such as legislators, senior officials and managers (an outcome variable) but does not include data on length of maternity leave (a policy variable).

Gender equality vs. women's empowerment

The third distinguishing feature of the Global Gender Gap Index is that it ranks countries according to their proximity to gender equality rather than to women's empowerment. Our aim is to focus on whether the gap between women and men in the chosen variables has declined, rather than whether women are "winning" the "battle of the sexes". Hence, the Index rewards countries that reach the point where outcomes for women equal those for men, but it neither rewards nor penalizes cases in which women are outperforming men in particular variables.

The four pillars

The Global Gender Gap Index examines the gap between men and women in four fundamental categories (subindexes): *economic participation and opportunity*, *educational attainment*, *health and survival* and *political empowerment*. Table 1 displays all four of these subindexes and the 14 different variables that compose them, along with the sources of data used for each.

Economic participation and opportunity

This subindex is captured through three concepts: the participation gap, the remuneration gap and the advancement gap. The participation gap is captured using the difference in labour force participation rates. The remuneration gap is captured through a hard data indicator (ratio of estimated female-to-male earned income) and a qualitative variable calculated through the World Economic Forum's Executive Opinion Survey (wage equality for similar work). Finally, the gap between the advancement of women and men is captured through two hard data statistics (the ratio of women to men among legislators, senior officials and managers, and the ratio of women to men among technical and professional workers).

Educational attainment

In this subindex, the gap between women's and men's current access to education is captured through ratios of women to men in primary-, secondary- and tertiary-level education. A longer-term view of the country's ability to educate women and men in equal numbers is captured through the ratio of the female literacy rate to the male literacy rate.

Health and survival

This subindex provides an overview of the differences between women's and men's health. To do this, we use two variables. The first variable is the sex ratio at birth,

which aims specifically to capture the phenomenon of "missing women" prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy, calculated by the World Health Organization. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition or other relevant factors.

Political empowerment

This subindex measures the gap between men and women at the highest level of political decision-making through the ratio of women to men in minister-level positions and the ratio of women to men in parliamentary positions. In addition, we include the ratio of women to men in terms of years in executive office (prime minister or president) for the last 50 years. A clear drawback in this category is the absence of any variables capturing differences between the participation of women and men at local levels of government. Should such data become available at a global level in future years, they will be considered for inclusion in the Global Gender Gap Index.

Construction of the Index

The Global Gender Gap Index is constructed using a four-step process, outlined below.

Convert to ratios

Initially, all data are converted to female/male ratios. For example, a country with 20% of women in ministerial positions is assigned a ratio of 20 women /80 men, thus a variable of 0.25. This is to ensure that the Index is capturing gaps between women and men's attainment levels, rather than the levels themselves.

Truncate data at equality benchmark

As a second step, these ratios are truncated at the "equality benchmark". For all variables, except the two health variables, this equality benchmark is considered to be 1, meaning equal numbers of women and men. In the case of the sex ratio at birth variable, the equality benchmark is set to be 0.944,² and the healthy life expectancy benchmark is set to be 1.06.³ Truncating the data at the equality benchmarks for each variable assigns the same score to a country that has reached parity between women and men and one where women have surpassed men.

The type of scale chosen determines whether the Index is rewarding women's empowerment or gender equality.⁴ To capture gender equality, two possible scales were considered. One was a *negative-positive scale* capturing the size and direction of the gender gap. This scale penalizes either men's advantage over women or women's advantage over men, and gives the highest points to absolute equality. The second choice was a *one-sided*

Table 1: Structure of the Global Gender Gap Index

Subindex	Variable	Source
Economic Participation and Opportunity	Ratio: female labour force participation over male value	International Labour Organisation, <i>Key Indicators of the Labour force Market (KILM)</i> , 2009
	Wage equality between women and men for similar work (converted to female-over-male ratio)	World Economic Forum, <i>Executive Opinion Survey</i> , 2012
	Ratio: estimated female earned income over male value	World Economic Forum, calculations based on the United Nations Development Programme methodology (refer to Human Development Report 2009)
	Ratio: female legislators, senior officials and managers over male value	International Labour Organisation, <i>LABORSTA Internet</i> , online database, 2008 or latest data available; United Nations Development Programme, <i>Human Development Report 2009</i> , the most recent year available between 1999 and 2007
	Ratio: female professional and technical workers over male value	International Labour Organisation, <i>LABORSTA Internet</i> , online database, 2008 or latest data available; United Nations Development Programme, <i>Human Development Report 2009</i> , the most recent year available between 1999 and 2007
Educational Attainment	Ratio: female literacy rate over male value	UNESCO Institute for Statistics, <i>Education Indicators</i> , 2011 or latest data available; World Bank's <i>World Development Indicators & Global Development Finance</i> online Database, 2010 or latest available data; United Nations Development Programme, <i>Human Development Report 2009</i> , the most recent year available between 1997 and 2007
	Ratio: female net primary level enrolment over male value	UNESCO Institute for Statistics, <i>Education Indicators</i> , 2011 or latest data available; World Bank's <i>World Development Indicators & Global Development Finance</i> online database, 2011 or latest available data
	Ratio: female net secondary level enrolment over male value	UNESCO Institute for Statistics, <i>Education Indicators</i> , 2011 or latest data available; World Bank's <i>World Development Indicators & Global Development Finance</i> online database, 2011 or latest available data
	Ratio: female gross tertiary level enrolment over male value	UNESCO Institute for Statistics, <i>Education Indicators</i> , 2011 or latest data available; World Bank's <i>World Development Indicators & Global development Finance</i> online database, 2011 or latest available data
Health and Survival	Sex ratio at birth (converted to female-over-male ratio)	Central Intelligence Agency, <i>The CIA World Factbook</i> , data updated weekly, 2012
	Ratio: female healthy life expectancy over male value	World Health Organisation, <i>Global Health Observatory database</i> , data from 2007
Political Empowerment	Ratio: females with seats in parliament over male value	Inter-Parliamentary Union, <i>Women in Politics: 2012</i> , reflecting elections/appointments up to 1 January 2012
	Ratio: females at ministerial level over male value	Inter-Parliamentary Union, <i>Women in Politics: 2012</i> , reflecting appointments up to 1 January 2012
	Ratio: number of years of a female head of state or government (last 50 years) over male value	World Economic Forum calculations, 30 June 2012

Note: If there are multiple sources, the first source listed is the primary source, followed by the secondary source if data were not available from the primary source. If data were not available from the primary or secondary sources, the third source listed was used.

scale that measures how close women are to reaching parity with men but does not reward or penalize countries for having a gender gap in the other direction. Thus, it does not reward countries for having exceeded the parity benchmark. We find the one-sided scale more appropriate for our purposes.

Calculate subindex scores

The third step in the process involves calculating the weighted average of the variables within each subindex to create the subindex scores. Averaging the different

variables would implicitly give more weight to the measure that exhibits the largest variability or standard deviation. We therefore first normalize the variables by equalizing their standard deviations. For example, within the educational attainment subindex, standard deviations for each of the four variables are calculated. Then we determine what a 1% point change would translate to in terms of standard deviations by dividing 0.01 by the standard deviation for each variable. These four values are then used as weights to calculate the weighted average of the four variables. This way of weighting variables allows us to make sure

Table 2: Calculation of weights within each subindex

Economic Participation and Opportunity Deviation	Standard deviation	Standard deviation per 1% point change	Weights
Ratio: female labour force participation over male value	0.160	0.063	0.199
Wage equality between women and men for similar work (converted to female-over-male ratio)	0.103	0.097	0.310
Ratio: estimated female earned income over male value	0.144	0.069	0.221
Ratio: female legislators, senior officials and managers over male value	0.214	0.047	0.149
Ratio: female professional and technical workers over male value	0.262	0.038	0.121
Total.....			1
Educational Attainment Deviation	Standard deviation	Standard deviation per 1% point change	Weights
Ratio: female literacy rate over male value	0.145	0.069	0.191
Ratio: female net primary level enrolment over male value	0.060	0.167	0.459
Ratio: female net secondary level enrolment over male value	0.120	0.083	0.230
Ratio: female gross tertiary enrolment over male value	0.228	0.044	0.121
Total.....			1
Health and Survival Deviation	Standard deviation	Standard deviation per 1% point change	Weights
Ratio: female healthy life expectancy over male value	0.023	0.441	0.307
Sex ratio at birth (converted to female over male ratio)	0.010	0.998	0.693
Total.....			1
Political Empowerment Deviation	Standard deviation	Standard deviation per 1% point change	Weights
Ratio: females with seats in parliament over male value	0.166	0.060	0.310
Ratio: females at ministerial level over male value	0.208	0.048	0.247
Ratio: number of years of a female head of state (last 50 years) over male value	0.116	0.086	0.443
Total.....			1

that each variable has the same relative impact on the subindex. For example, a variable with a small variability or standard deviation, such as primary enrolment rate, gets a larger weight within the educational attainment subindex than a variable with a larger variability, such as tertiary enrolment rate. Therefore, a country with a large gender gap in primary education (a variable where most countries have achieved near-parity between women and men) will be more heavily penalized. Similarly, in the case of the sex ratio variable (within the health and survival subindex), where most countries have a very high sex ratio and the spread of the data is small, the larger weight will penalize more heavily those countries that deviate from this value. Table 2 displays the values of the weights used in the Global Gender Gap Index 2006.⁵

Calculate final scores

In the case of all subindexes, the highest possible score is 1 (equality) and the lowest possible score is 0 (inequality), thus binding the scores between inequality and equality benchmarks.⁶ An un-weighted average of each subindex score is used to calculate the overall Global Gender Gap Index score. As in the case of the subindexes, this final value ranges between 1 (equality) and 0 (inequality), thus allowing for comparisons relative

to ideal standards of equality in addition to relative country rankings.⁷ The equality and inequality benchmarks remain fixed across time, allowing the reader to track individual country progress in relation to an ideal standard of equality. Furthermore, we hope that the option of roughly interpreting the final Index scores as a percentage value that reveals how a country has reduced its gender gap makes the Index more intuitively appealing to readers.⁸

THE GLOBAL GENDER GAP INDEX 2012 RANKINGS

We aim to include a maximum number of countries in the *Report* every year, within the constraints posed by data availability. To be included in the *Report*, a country must have data available for a minimum of 12 indicators out of the 14 that make up the Index.

Country coverage 2012

In 2012, we have been able to include 132 of the 135 countries covered in the 2011 edition of the *Report*. Due to lack of updated data, we have removed Angola, Tunisia and Zimbabwe from the *Report* in 2012. However, we were able to include three new countries—Cape Verde, Serbia and Timor-Leste, maintaining a total of 135 countries. Of these, 111 have been included in the *Report* since the first edition in 2006.

Figure 1: Global patterns, 2012

Source: Global Gender Gap Index 2012; scores are weighted by population.

Nearly 200 countries were considered for inclusion this year. Out of the 135 ultimately covered in this *Report*, 13 countries had one data point missing: Bahamas (Wage equality for similar work [survey]) Belize (Wage equality for similar work [survey]) Botswana (Women in ministerial positions) Brunei Darussalam (Women in parliament) Ghana (Professional and technical workers) Jamaica (Professional and technical workers) Maldives (Wage equality for similar work [survey]) Russian Federation (Enrolment in secondary education) Serbia (Labour force participation) Singapore (Enrolment in tertiary education) Sri Lanka (Women in ministerial positions) Syria (Wage equality for similar work [survey]) and Vietnam (Enrolment in primary education).

Another 24 countries had two variables missing: Albania (Legislators, senior officials and managers; Professional and technical workers), Benin (Legislators, senior officials and managers; Professional and technical workers), Burkina Faso (Legislators, senior officials and managers; Professional and technical workers), Burundi (Legislators, senior officials and managers; Professional and technical workers), Cameroon (Legislators, senior officials and managers; Professional and technical workers), Cape Verde (Legislators, senior officials and managers; Professional and technical workers), Chad (Legislators, senior officials and managers; Professional and technical workers), Côte d'Ivoire (Legislators, senior officials and managers; Professional and technical workers), Cuba (Legislators, senior officials and managers; Professional and technical workers), Fiji (Wage equality for similar work [survey] and Women in parliament), Gambia (Legislators, senior officials and managers; Professional

and technical workers), Guatemala (Legislators, senior officials and managers; Professional and technical workers), India (Legislators, senior officials and managers; Professional and technical workers), Jordan (Legislators, senior officials and managers; Professional and technical workers), Kenya (Legislators, senior officials and managers; Professional and technical workers), Luxembourg (Legislators, senior officials and managers; Professional and technical workers), Malawi (Legislators, senior officials and managers; Professional and technical workers), Mali (Legislators, senior officials and managers; Professional and technical workers), Mauritania (Legislators, senior officials and managers; Professional and technical workers), Mozambique (Legislators, senior officials and managers; Professional and technical workers), Nigeria (Legislators, senior officials and managers; Professional and technical workers), Senegal (Legislators, senior officials and managers; Professional and technical workers), Tajikistan (Legislators, senior officials and managers; Professional and technical workers) and Timor-Leste (Legislators, senior officials and managers; Professional and technical workers).

Global patterns

Figure 1 shows a global snapshot of the gender gap in the four subindexes. It shows that the 135 countries covered in the *Report*, representing over 90% of the world's population, have closed almost 96% of the gap in health outcomes between women and men and almost 93% of the gap in educational attainment. However, the gap between women and men on economic participation

Table 3a: The Global Gender Gap Index 2012 rankings: comparisons with 2011, 2010, 2009, 2008, 2007 and 2006

Figure 2: Regional performance on the Global Gender Gap Index 2012

Source: Global Gender Gap Index 2012; details of regional classifications in Appendix B.

Scores are weighted by population; population data from the World Bank's *World Development Indicators (WDI)* online database 2011, accessed July 2012.

and political empowerment remains wide: only 60% of the economic outcomes gap and only 20% of the political outcomes gap have been closed.

The detailed rankings from this year's Index are shown in Tables 3 through 5.

Table 3a displays the 2012 rankings and provides comparisons with rankings in 2011, 2010, 2009, 2008, 2007 and 2006. Table 3b displays the complete 2012 rankings, including the four subindex scores and ranks. Table 3c provides the year-to-year score changes over the last seven years. Out of the 111 countries that have been involved every year since 2006, 98 (88%) have improved their performance over the last four years, while 13 (12%) have shown widening gaps.

Table 4 shows the rankings of countries by income group (Table B2 in Appendix B displays the income group categories used). In 2012, in the high-income group, the Nordic countries lead the way while Saudi Arabia (131) is the lowest performing country in this category. In the upper-middle income group, Latvia (15) ranks highest while Iran (127) occupies the lowest position. In the lower-middle-income group, the Philippines (8) comes out on top while Yemen (135) holds last position. In the lower-income group, Mozambique (23) is the strongest performer while Chad (133) is in last place.

Table 5 shows the rankings of countries by subindex. In 2012, 20 countries have fully closed the gap in educational attainment while Chad, the lowest-ranking

country on this subindex, has closed only about 52 percent of its gender gap. Thirty-two countries have closed the gap in health and survival. China, Albania, India and Azerbaijan are the lowest-ranking countries on this subindex.

Nine countries have closed the gap on both the health and education subindexes. No country has closed the economic participation gap or the political empowerment gap. On the economic participation and opportunity subindex, the highest-ranking country (Mongolia) has closed over 84% of its gender gap while the lowest ranking country (Syria) has closed only 27% of its economic gender gap. There is similar variation in the political empowerment subindex. The highest-ranking country (Iceland) has closed almost 73% of its gender gap whereas the lowest-ranking country (Saudi Arabia) has closed none of the political empowerment gap according to this measure.

Regional trends

Figure 2 displays the regional performance on the overall Index score, while Figures 3 through 6 display regional performances on each of the four subindexes.⁹ All scores are weighted by population to produce the regional averages. Table B1 in Appendix B displays the regional categories used.¹⁰ In the overall Index scores shown in Figure 2, North America holds the top spot, while the Middle East and North Africa region occupies the last place, having closed almost 59% of its gender gap. Table 6 displays the rankings within each regional category.

(Cont'd.)

In the economic participation and opportunity scores shown in Figure 3, North America holds the top spot while the Middle East and North Africa region is in the last place. In the educational attainment scores shown in Figure 4, North America once again tops the rankings while Sub-Saharan Africa holds last place.

In the health and survival scores shown in Figure 5, North America holds the top spot, while Asia and the Pacific occupies the last place as the worst region for women's health and survival relative to that of men. In the political empowerment scores shown in Figure 6, while all regions are well below parity, Asia and the Pacific leads the way, while the Middle East and North Africa region is in last

place. Table 6 displays the rankings within each regional category.

Top 10

Four Nordic countries that have consistently held the highest positions in previous editions of the Global Gender Gap Index continue to hold these privileged positions. **Iceland** (1) still holds the top spot, closely followed by **Finland** (2), **Norway** (3) and **Sweden** (4). Finland and Norway exchange spots in the rankings this year.

Although no country has yet achieved gender equality, all of the Nordic countries, with the exception of Denmark, have closed over 80% of the gender gap and thus serve as models and useful benchmarks for international

comparisons. While many global indexes tend to be tied to income levels, thus providing an advantage to the high-income Nordic economies, the Global Gender Gap Index is disassociated from the income and resource level of an economy and instead seeks to measure how equitably the available income, resources and opportunities are distributed between women and men. Despite this feature of the Index, these countries emerge as top performers and true leaders on gender equality.

All Nordic countries reached 99-100% literacy for both sexes several decades ago and display gender parity at both primary- and secondary-level education. At the tertiary level, in addition to very high levels of enrolment for both women and men, the gender gap has been reversed

and women now make up the majority of the high-skilled workforce. In Norway, Sweden and Iceland there are over 1.5 women for every man enrolled in tertiary education, and in Finland and Denmark women also make up the majority of those in tertiary education. The Nordic countries also exhibit very high healthy life expectancies for both women and men, with women living, on average, three to four healthy years longer than men.

While many developed economies have succeeded in closing the gender gap in education, few have succeeded in maximizing the returns from this investment. The Nordic countries are leaders in this area—all five countries feature in the top 30 of the economic participation and opportunity subindex. This occurs because of a combination of factors:

the labour force participation rates for women are among the highest in the world; salary gaps between women and men are among the lowest in the world, although not non-existent; and women have abundant opportunities to rise to positions of leadership. These patterns vary across the Nordic countries, but, on the whole, these economies have made it possible for parents to combine work and family, resulting in high female employment participation rates, more shared participation in childcare, more equitable distribution of labour at home, better work-life balance for both women and men and in some cases a boost to declining fertility rates. Policies in these countries include mandatory paternal leave in combination with maternity leave, generous federally mandated parental leave benefits provided by a combination of social insurance funds and employers, tax incentives and post-maternity re-entry programmes. Together these policies have also led to relatively higher and rising birth rates occurring simultaneously with high female workforce participation in the Nordic countries, compared to other OECD economies such as Germany, Japan, Italy and Spain where both birth rates and participation are lower. The Nordic experience points to fewer problems with ageing in the future, as well as higher labour activity and a more robust economy. Finally there has also been success with a top-down approach to promoting women's leadership. In Norway, since 2008, publicly listed companies have been required to have 40% of each sex on their boards. Other countries are adopting similar measures.

The Nordic countries were also early starters in providing women with the right to vote (Sweden in 1919, Norway in 1913, Iceland and Denmark in 1915, Finland in 1906). In Denmark, Sweden and Norway, political parties introduced voluntary gender quotas in the 1970s, resulting in high numbers of female political representatives over the years. In Denmark, in fact, this quota has since been abandoned as no further stimulus is required. Today, Sweden has among the highest percentages of women in parliament in the world (44.7%) while the other Nordic countries are almost as successful. These countries have a similarly strong record on the percentage of women in ministerial level positions.

Next in the top ten, **Ireland** (5), **New Zealand** (6), **Denmark** (7) and the **Philippines** (8) maintain their positions from last year. The Philippines remains the highest-ranking country from Asia in the Index. It ranks 1st on both education and health and is also among the top 20 on economic participation and political empowerment. The Philippines is the only country in Asia this year to have closed the gender gap in both education and health. **Nicaragua** (9) replaces Lesotho in the top ten this year. Nicaragua's gains in the rankings are driven by changes in political empowerment particularly an increase in the percentage of women in parliament (from 21% to 40%) and an increase of the percentage of women holding ministerial positions (38% to 46%). **Switzerland** (10) remains among

the top 10 for the third consecutive year and continues to show gains in educational attainment, economic participation and political empowerment.

Europe and Central Asia

Europe and Central Asia has closed 70% of the gender gap and is second only to North America on the overall Global Gender Gap Index 2012 scores. The region ranks third in the health and survival (98% of gender gap closed) and educational attainment (99% of gender gap closed) subindexes. Europe and Central Asia ranks second on the economic participation and opportunity subindex, behind North America, and second on the political empowerment subindex behind Asian and the Pacific. In the overall Index, seven European countries rank among the top 10 and 14 countries rank among the top 20. Four out of the nine countries that have closed both their educational attainment and health and survival gender gaps are from this region. Seven out of the top 20 performing countries on the economic participation and opportunity subindex and 11 out of the top 20 performing countries on the political empowerment subindex are also from the region. Fourteen of the top 20 countries on the professional and technical workers indicator are from the region; specifically, from Eastern Europe and Central Asia. Twelve out of the top 20 countries in healthy life expectancy are from the region; primarily from Eastern Europe and Central Asia. Six countries from the region are among the 10 lowest performing countries on the sex ratio indicator; all six are in Eastern Europe or Central Asia.

Iceland (1) ranks first on the overall ranking for the fourth consecutive time this year. Iceland is followed by **Finland** (2), **Norway** (3) and **Sweden** (4). Finland is one of the four countries from the region that has closed both its educational attainment and health and survival gender gaps. **Ireland** (5) keeps the same place as last year and **Denmark** (7) ranks seventh for the fifth consecutive year. **Switzerland** (10) remains in the top 10 for the third consecutive year.

Netherlands (11) gains four places, mainly due to improvements in the estimated earned income ratio and women in ministerial positions. **Belgium** (12) moves up one position this year due to a significant increase in the percentage of women in ministerial positions (33% in 2011 to 42% in 2012). **Germany** (13) loses two places this year as a result of new data becoming available for tertiary education. **Latvia** (15) gains four places in the rankings primarily due to an improvement in estimated earned income but also in the percentage of women holding ministerial positions. Additionally, Latvia is one of the four countries from the region that has closed both its educational attainment and health and survival gender gaps, and is the best performing country from the region on the legislators, senior officials and managers indicator, ranking 11th place.

Latvia is followed by **Luxembourg** (17), the **United Kingdom** (18) and **Austria** (20). Luxembourg shows a significant improvement in its ranking, gaining 13 places. Luxembourg's leap in the rankings is the consequence of a decrease in the wage gap and an increase of the percentage of women in parliament. Data for legislators, senior officials and managers has been discarded due to lack of updated information. Luxembourg's performance over the last seven years puts it among the top climbers of the 111 countries that have been included in the *Report* since 2006. The United Kingdom slips two spots relative to its performance last year. This is mainly the result of a decrease in the percentage of women in ministerial positions, which decreased from 23% to 17%. Austria moves up fourteen places this year due to increases in the economic participation and opportunity and educational attainment and political empowerment subindexes.

Next in the rankings are **Spain** (26), **Kazakhstan** (31), **Lithuania** (34) and **Slovenia** (38). Spain loses fourteen spots this year. The most significant drop for the country is in the percentage of women in ministerial positions. Kazakhstan experiences the largest leap in the region's ranking, moving up eighteen places. This is the consequence of a decrease in the wage gap and increase in the percentage of women in parliament and ministerial positions (5% in 2011 to 16% in 2012). Kazakhstan also holds the top position on the sex ratio at birth indicator. Both Lithuania and Slovenia move up three places in the rankings. Lithuania's gain is due to improvements in the economic participation and opportunity and educational attainment and political empowerment subindexes. Slovenia experiences a small decrease in the economic participation and opportunity and health and survival subindexes as well as in the percentage of women in ministerial positions. However, these losses are offset by a significant improvement in the percentage of women in parliament (from 14% in 2011 to 31% in 2012).

The next spots in the region are occupied by **Moldova** (45), **Portugal** (47) and **Croatia** (49). Moldova loses six positions relative to its ranking last year. Moldova's drop is mainly driven by losses in the economic participation and opportunity subindex. Portugal displays a drop of twelve places caused mainly by a decrease in the ratio of primary and tertiary education as well as in the percentage of women in ministerial positions (31% in 2011 to 18% in 2012). Croatia gains one place to reach the 49th position with a minor improvement in the representation of women in ministerial positions.

Serbia (50) enters the Index for the first time this year, in fiftieth position. **Bulgaria** (52) slips one place this year. **Poland** (53) loses eleven places due to a drop in wage equality, decreases across the education subindex and in the percentage of women holding ministerial positions categories. The **Kyrgyz Republic** (54) falls ten places this year to take 54th position, primarily due to a drop in the

economic participation and opportunity and educational attainment and health and survival subindexes.

The Kyrgyz Republic is followed by **France** (57), the **Russian Federation** (59), **Estonia** (60) and **Macedonia, FYR** (61). France loses nine places relative to last year's ranking, primarily due to a decrease in the percentage of women in ministerial positions. France is one of the four countries from the region that has closed both its educational attainment and health and survival gender gaps but it also ranks last overall on the perceived wage equality survey indicator. The Russian Federation slips down to 59th position this year due to losses in the economic participation and opportunity and political empowerment subindexes. The Russian Federation is the best performing country on the healthy life expectancy indicator. Both Estonia and Macedonia, FYR move down eight places this year. Estonia's ratios in both wage equality and primary and secondary education decrease. Despite this drop, Estonia is the best performing country on the professional and technical workers indicator. Macedonia, FYR's improvement in the percentage of women in ministerial positions is balanced out by decreases in perceived wage equality, estimated earned income, sex ratio and tertiary enrolment ratios categories. Macedonia FYR is one of the four countries from the region that performs below average on the health and survival subindex.

Ukraine (64) follows next, holding the same position this year as last, despite a slight overall improvement in score. Ukraine is one of the 20 lowest performing countries on the political empowerment subindex. **Romania** is next in 67th position, closely followed by the **Slovak Republic** (70), **Czech Republic** (73) and **Cyprus** (79). Romania gains one position due to improvements in the political empowerment subindex. The Slovak Republic and the Czech Republic move up two spots this year. The Slovak Republic's gain is mainly driven by improvements on the three indicators of the political empowerment subindex. Additionally, the Slovak Republic is one of the four countries from the region that has closed both its educational attainment and health and survival gender gaps. For the Czech Republic, the improvement is largely explained by increases in the perceived wage equality and in the estimated earned income. Cyprus improves in the overall rankings, rising from 93rd to 79th in 2012 due to an increase in the number of women in ministerial positions (9% in 2011 to 27% in 2012).

The next spots in the region are occupied by **Italy** (80), **Hungary** (81), **Greece** (82), **Georgia** (85) and **Malta** (88). Italy slips six places in the rankings this year. The largest losses for the country are in perceived wage equality, secondary and tertiary education, sex ratio at birth and in the number of women in ministerial positions. Hungary gains four places due to improvements in the estimated earned income and percentage of women in ministerial positions (0% in 2011 to 10% in 2012). Hungary is one

of the 20 lowest performing countries on the political empowerment subindex. Greece experiences the biggest drop in the region, ranking this year in 82nd position. This is primarily the result of a change in the percentage of women holding ministerial positions (31% in 2011 to 6% in 2012). Georgia gains one place this year. Although its educational attainment subindex score has decreased, this is balanced out by improvements in the economic participation and opportunity, health and survival and political empowerment subindexes. Additionally, Georgia is one of the four countries from the region that performs below the global average on the health and survival subindex. Malta moves down five spots this year, primarily as a result of lower primary, secondary and tertiary education enrolment ratios but also due to decreases in the sex ratio at birth and percentage of women in ministerial positions.

Albania (91) and **Armenia** (92) follow. Albania slips down thirteen spots from the combined effect of lower scores in perceived wage equality, estimated earned income, secondary education and the percentage of women parliamentarians. Furthermore, Albania is one of the four countries from the region that performs below the global average on the health and survival subindex. Armenia falls eight places, ranking 91st position this year. This fall is the consequence of a significant decrease in the estimated earned income ratio. Armenia is one of the four countries from the region that performs below average on the health and survival subindex.

Next are **Tajikistan** (96) and **Azerbaijan** (99). Although Tajikistan's ranking does not change this year, it shows a slight increase in its overall score. Tajikistan ranks 129th on the enrolment in tertiary education indicator. Azerbaijan slips eight spots due to decreases in secondary and tertiary education and in the sex ratio at birth, and is the lowest performing country from the region on the legislators, senior officials and managers indicator. **Turkey** (124) occupies the last place in the regional rankings, losing two places this year despite a slight increase in score. The country performs above average on the health and survival subindex but lags behind on the other three subindexes. Turkey is the lowest performing country from the region on the economic participation and opportunity subindex.

North America

The North America region has closed 74% of the gender gap and is first among the different regions on the overall Global Gender Gap Index 2012 scores. The region ranks first on the economic participation and opportunity subindex (81% of gender gap closed), the educational attainment subindex (100% of gender gap closed) and the health and survival subindex (98% of gender gap closed). On the political empowerment subindex, the region ranks fifth, ahead of only the Middle East and North Africa (16% of the gender gap closed).

Both Canada and the United States slip out of the top 20 this year. **Canada** (21) falls three places this year to take the 21st position in the overall ranking. This is the result of a small decrease in the secondary education ratio and in the percentage of women in ministerial positions. Canada is among the top 20 best performing countries on the economic participation and opportunity subindex. Canada ranks 20th on the labour force participation indicator and 21st on the professional and technical workers indicator.

The **United States** (22) loses five places this year. The United States' economic participation and opportunity subindex score improves due to increases in the perceived wage equality ratio and the estimated earned income ratio but this is offset by a decrease in the percentage of women in ministerial level positions (33% in 2011 to 27% in 2012). The United States shows no gap in education attainment with very high levels of literacy and women's enrolment in primary, secondary and tertiary education. In particular, women's gross tertiary level enrolment at 111% far outstrips that of men at 79%. The United States places 8th in the world in terms of economic participation and opportunity, a drop of two places compared to last year, although it continues to perform well on the legislators, senior officials and managers indicator, ranking 10th on this category. The United States performs below the global average on the political empowerment subindex, with 17% women parliamentarians.

Latin America and the Caribbean

The Latin America and Caribbean region has closed 69% of its overall gender gap. The region performs well on the educational attainment and health and survival subindexes, holding for both subindexes the 2nd position just after North America. Thirteen countries have fully closed their gender gaps in the health and survival subindex and four have fully closed gaps in educational attainment. With regard to the latter subindex, no country from the region performs below the global average. On the Economic Participation and Opportunity subindex, the region lies in the fourth place, just ahead of Asia and the Pacific and the Middle East and North Africa, but performs well on certain indicators such as legislators, senior officials and managers, where ten out of the 20 best performers globally are from Latin America and the Caribbean. Finally, the region ranks ahead of Sub-Saharan Africa, North America and the Middle East and North Africa on the political empowerment subindex, having closed 18% of its gender gap.

Nicaragua (9) leads the way in Latin America and the Caribbean and is the only country from the region to hold a place in the top 10 of the global rankings. **Cuba** (19) gains one place this year, with a high proportion of women among professional and technical workers (60%). It is also the country with the highest percentage of women parliamentarians (45.2%) among the 135 countries covered. Cuba is followed by **Barbados** (27), **Costa Rica**

(29) and **Bolivia** (30). Barbados moves up in the rankings, gaining six places mainly due to an increase in women holding ministerial positions. Barbados is one of the three countries from the region that have closed the gender gap in both the education attainment and health and survival. Barbados is the best performer on literacy rates and holds the region's highest position in the wage equality survey. Costa Rica loses four places this year, whereas Bolivia gains 32 positions the greatest climb in the region. This move is mainly due to a significant increase in the percentage of women in ministerial positions (from 20% to 45%).

Argentina (32), **Ecuador** (33), the **Bahamas** (37) and **Panama** (40) occupy the next positions in this region's rankings. Argentina slips down four places, due in part to the decrease in the political empowerment subindex, despite an additional year with a female head of state. Ecuador gains twelve spots from last year. This is the result of an improvement across all subindexes with the exception of Health and Survival. The Bahamas has dropped fifteen places this year. This is partly due to new data on estimated earned income that had previously not been factored into the index calculations for the Bahamas. The Bahamas holds the third position overall on the literacy rate and tertiary education indicators and is one of the three countries from the region that have closed the gender gap in both the educational attainment and health and survival subindexes. Panama maintains its position relative to last year although its overall score slightly improves.

Next in the rankings are **Guyana** (42) and **Trinidad and Tobago** (43). Guyana slips down four spots relative to its performance last year due to a small decrease in the percentage of women in ministerial positions. Trinidad and Tobago declines in the overall rankings (from 21st to 43rd position). This is the result of a decrease in the healthy life expectancy ratio and in the percentage of women holding ministerial positions. Trinidad and Tobago is the region's lowest performing country on the health and survival subindex.

Trinidad and Tobago is followed by **Venezuela** (48) and **Jamaica** (51). Venezuela gains fifteen positions due to an improvement in the percentage of women in ministerial positions (26% to 39%). Jamaica slips down four spots due to a decrease in the economic participation and opportunity subindex. Jamaica is overall the best performer on the legislators, senior officials and managers indicator and the second best on the literacy rate indicator.

Brazil (62) follows next in the rankings just before **Colombia** (63), with an increase in the overall ranking (from 82nd to 62nd position). This is the result of improvements in primary education and in the percentage of women in ministerial positions (from 7% to 27%). The tenure of President Dilma Rousseff further boosts Brazil's overall score. Brazil is one of the three countries from the region that have closed the gender gap in both the education attainment and health and survival subindexes. Colombia

gains seventeen places this year due to a significant increase in the estimated earned income ratio as well as the percentage of women in ministerial positions.

The next spots in the region are occupied by **Honduras** (74), **Uruguay** (76), **Peru** (78), **Paraguay** (83) and **Mexico** (84). Honduras falls in the rankings by twenty places. This drop is caused mainly by a decrease in the number of women in ministerial positions, which fell from 36% to 18%. Honduras is the lowest performing country from the region on the labour force participation indicator. Uruguay shows a decline in the overall rankings, dropping from 58th place in 2011 to 76th place in 2012, mainly due to a decrease in the political subindex. Peru slips five places this year compared to last year because of a decrease in the wage equality ratio and in the percentage of women holding ministerial positions. Paraguay loses sixteen positions relative to last year, mainly due to a significant decrease in women holding ministerial positions (21% in 2011 to 7% in 2012). Mexico moves up in the overall ranking, gaining five places. This gain is caused mainly by the increase in the percentage of women in ministerial positions, which rises from 11% to 21% this year, and a small improvement in the perceived wage equality.

Mexico is followed by **Chile** (87), **Dominican Republic** (89) and **El Salvador** (94). Chile experiences the biggest drop in the overall ranking of the region (from 46th to 87th position) due to a substantial decrease in the percentage of women holding ministerial positions. Chile is also part of the five lowest performing countries on the perceived wage equality indicator. The Dominican Republic slips down eight places this year due to the decrease in the ratios of primary and secondary education. El Salvador maintains its position relative to last year although its overall score slightly increases this year.

The final positions in the region are occupied by **Belize** (102), **Suriname** (106) and **Guatemala** (116). Belize displays a small decline in the overall ranking, dropping from 100th to 102nd place in 2012. Belize holds the lowest rank in the region on the primary education indicator. Suriname and Guatemala fall in the rankings by two and four places, respectively. Suriname is the lowest performing country from the region on the economic participation and opportunity subindex. Guatemala remains the lowest-ranking country in the Latin America and Caribbean region.

The Middle East and North Africa

The Middle East and North Africa region has closed just over 59% of the overall gender gap. The region ranks lowest on economic participation and opportunity and political empowerment (eight of the ten lowest performing countries on the labour force participation and estimated earned income indicators are from the region, as are the four countries that have no women parliamentarians). The region performs second lowest on the educational attainment subindex, while on health and survival, the Middle East and North Africa region is in third place

(behind Europe and Central Asia, Latin America and the Caribbean and North America).

The highest-ranking economies of the region have made vast investments in increasing women's education levels in the last decades. In Qatar, the United Arab Emirates, Kuwait, Bahrain, Algeria, Oman, Israel, Lebanon, Jordan and Saudi Arabia, the tertiary education enrolment rates for women are higher than those of men. However, these countries have had varying degrees of success at integrating women into the economy in order to reap the benefits of this investment.

Israel (56) continues to hold the top spot in the Middle East and North Africa region, supported by a higher-than-average performance on the economic participation and opportunity and political empowerment subindexes. Israel slips one despite a slight increase in score due to the relative gains made by other countries in the rankings.

The **United Arab Emirates** (107) continues to hold the top position among the Arab countries and is the only country from the region that has closed the educational attainment gap. However, the UAE falls four places in the overall ranking this year due to a decrease in the estimated earned income and women in parliament indicators. **Kuwait** (109) and **Bahrain** (111) follow in the rankings, favoured by higher-than-average performances on the educational attainment and health and survival subindexes. Kuwait loses four places this year. This is due to a significant decrease in women in parliament (from 8% in 2011 to 0% in 2012). Kuwait is part of the top 10 performing countries on the tertiary education enrolment indicator. Bahrain loses one place because of a worsening perception of wage equality between women and men for similar work. **Qatar** (115) occupies the next position in the overall ranking, slipping down four places this year. Qatar is one of the two countries with a zero score on the political empowerment subindex and the only country from the region that ranks below the global average on the Health and Survival subindex. However, Qatar is among the top three performing countries in enrolment in secondary education and the top country in tertiary education enrolment amongst the 135 countries covered. Next in the rankings are **Mauritania** (119), **Algeria** (120), **Jordan** (121) and **Lebanon** (122). Mauritania falls five places, mainly due to a decrease in the primary, secondary and tertiary enrolment ratios as well as a decrease in the percentage of women holding ministerial positions. Mauritania is amongst the top 10 countries for the enrolment in primary education indicator. Algeria gains one place, most notably through an increase in the percentage of women in parliamentary positions (from 8% to 32%). Jordan loses four places following a decrease in the scores of the economic, education and political subindexes. Lebanon also moves down four spots, due to a decrease in perceived wage equality and percentage of women in ministerial positions (from 7% to 0%).

Lebanon is followed by **Oman** (125), **Egypt** (126) and **Morocco** (129). Oman gains two places due to an improvement in the perceived wage equality but in particular as a result of an increase in secondary and tertiary enrolment ratios. Egypt falls three places this year as a result of a worsening perception of wage equality between women and men for similar work and decrease in enrolment in secondary education. Morocco's ranking does not change this year despite a small overall gain in the score.

Saudi Arabia (131), **Syria** (132) and **Yemen** (135) are the lowest-ranking Middle East and North African countries in the Index. Saudi Arabia maintains its position relative to last year, although its overall score slightly falls because of a small decrease in the perceived wage equality and estimated earned income. Saudi Arabia is also one of the two countries with a political empowerment subindex score of zero. Syria slips down eight spots relative to its performance last year because of decreases in the estimated earned income. As there is an average lag of two years in the data, the scores represent a situation before the current outbreak of violence. Syria is the lowest performing country on the economic participation and opportunity subindex.¹¹ Finally, Yemen continues to occupy the last place in the region as well as in the overall ranking of 135 countries, and is the region's lowest performing country on the education attainment subindex. However, Yemen has experienced an absolute increase in its overall score and has closed more than 50% of its gender gap this year, putting Yemen among the top ten climbers of the 111 countries that have been included in the *Report* since 2006.

Asia and the Pacific

With 66% of the gender gap closed, the Asia and the Pacific region occupies the fifth place out of six regions on the overall score. The region occupies the same place on the economic participation and opportunity subindex and the fourth on the educational attainment subindex. On the Health and Survival subindex, Asia and the Pacific region occupies the last place (three of the five lowest performing countries on the sex ratio at birth indicator are from the region), whereas on the political empowerment subindex Asia and the Pacific occupies the first place.

New Zealand (6) and the **Philippines** (8) continue to lead the way in Asia and the Pacific and are the only two countries from the region to hold places in the top 10 of the global rankings. Both countries' rankings do not change this year. New Zealand is present in the top 15 performing countries on the economic participation and opportunity and educational attainment subindexes and is in the top 10 performing countries in the political empowerment subindex. The Philippines is the only country from the region that has closed the educational attainment and health and survival gender gaps. The Philippines also performs in the top 10 of the following indicators:

legislators, senior officials and managers, literacy rate, enrolment in secondary education and years with female head of state.

Australia (25) loses two positions relative to last year due to a small decrease in women at ministerial positions, though it continues to hold a strong position in the rankings due to high levels of education, economic participation and political empowerment. **Sri Lanka** (39), **Mongolia** (44) and **Singapore** (55) follow next. Sri Lanka falls eight spots relative to its performance last year as a result of a decrease in the political empowerment subindex. Sri Lanka is part of the top ten performing countries on the enrolment in tertiary education and years with female head of state. Sri Lanka is also one of the five countries from the region that have closed the health and survival subindex. Mongolia experienced a decline in the overall rankings (from 36th to 44th position). This drop is caused mainly by a decrease in the perceived wage equality between women and men for similar work and in the estimated earned income ratio. Mongolia ranks 6th on the legislators, senior officials and managers indicator and 7th on the literacy rate indicator. Mongolia is also the best performing country on the economic participation and opportunity subindex but one of the lowest performing countries on the political empowerment subindex. Singapore gains two places this year, most notably through an increase in the estimated earned income ratio. Singapore is part of the 20 best performing countries in the economic participation and opportunity subindex but also one of the nine countries without a female minister.

Singapore is followed by **Thailand** (65), **Vietnam** (66), **Timor-Leste** (68) and **China** (69). Thailand loses five places in the ranking, due to decreases in the perceived wage equality and estimated earned income ratios. Thailand is one of five countries from the region that has closed the health and survival subindex. Vietnam gains thirteen places this year, most notably through an increase in the enrolment in tertiary education and in the percentage of female ministers. Unlike the previous year, primary education data is not available this year. Vietnam's improvement in the 2012 rankings is the most significant improvement in the region. Despite this important gain, Vietnam shows a disproportionate sex ratio at birth. Timor-Leste enters the Index for the first time this year. China slips from the 61st to 69th position due to a decrease in the perceived wage equality between women and men for similar work. China is the fourth-lowest ranking country on the health and survival subindex (132), the result of a disproportionate sex ratio at birth, although there have been minor improvements over the last year.

The next spots in the region are occupied by **Brunei Darussalam** (75), **Bangladesh** (86), the **Maldives** (95) and **Indonesia** (97). Brunei Darussalam gains one place relative to its rank in 2011 but continues to be one of the nine countries that have no female ministers. Bangladesh falls seventeen places this year, due to a decrease in

the wage equality survey, the estimated earned income and a significant decrease in the ratio of the enrolment rate in primary education. Bangladesh ranks 8th on the political empowerment subindex. The Maldives shows an improvement in the overall rankings, rising from 101st in 2011 to 95th in 2012. The Maldives' leap in the rankings is boosted by an increase in the primary education ratio and in the percentage of women holding ministerial positions (from 7% in 2011 to 21% in 2012). Indonesia slips down seven places in the ranking due to a decrease of women in ministerial positions.

Malaysia (100), **Japan** (101), **Cambodia** (103) and **India** (105) are found in the lower half of the rankings within the region. Both Malaysia and Japan fall in the rankings by three places. Malaysia's decrease is due to the decrease of the sex ratio whereas for Japan it is due to a small decrease in the percentage of women parliamentarians and the decrease of the sex ratio at birth. Malaysia is the second best performing country on the wage equality data. Japan is part of the region's ten lowest performing countries on the legislators, senior officials and managers indicator, which shows that women still make up a fairly low percentage of the senior and highly skilled positions. Cambodia slips relative to its performance last year due to the decrease in women in ministerial positions (10% in 2011 to 5% in 2012). Cambodia is one of the five countries from the region that has closed the gap on the health and survival subindex. India gains eight places as a result of improvements in the education attainment and political empowerment subindexes. India is the lowest ranked of the BRIC economies featured in the Index; it performs above average on the political empowerment of women but lags behind in the other three categories. The persistent health, education and economic participation gaps will be detrimental to India's growth. The disproportionate sex ratio at birth has not changed over the past year.

India is followed by **Korea Rep.** (108) and **Fiji** (113). Korea Rep. loses a place in the ranking due to a decrease in the sex ratio at birth. Fiji falls four places this year and is one of the five countries from the region that has closed the gap on the health and survival subindex. In both countries, women still make up a fairly low percentage of the senior and highly skilled positions. **Nepal** (123), **Iran, Islamic Rep.** (127) and **Pakistan** (134) occupy the last places in the regional rankings. Nepal moves up in the rankings from the 126th to 123rd position, mainly because of higher perceived wage equality ratio, estimated earned income and women in ministerial positions. Nepal is among the highest climbers of the 111 countries that have been included in the *Report* since 2006 but also among the ten lowest performing countries on enrolment in tertiary education. Iran, Islamic Rep. slips in the rankings to the 127th position due to a worsening of the estimated earned income ratio. Finally, Pakistan moves down in the rankings from the 133rd to 134th position due to a worsening in the perceived wage equality. Pakistan performs below the

global average on all four subindexes and now occupies the last spot in the Asia and Pacific region.

Sub-Saharan Africa

The Sub-Saharan Africa region has closed 66% of its gender gap and performs well on the economic participation and opportunity subindex, ranking just behind Europe and Central Asia and North America. Out of the top 15 overall performers on the labour force participation gender gap indicator, nine countries are from the region. However, regarding the educational attainment subindex, Sub-Saharan Africa is the region with the largest gender gap. On the health and survival subindex, the region lies 5th just before Asia and the Pacific. This is due to poor enrolment rates and low levels of life expectancy. Out of the bottom 10 countries on the literacy rate and on the enrolment rate in tertiary education indicators, seven and six respectively are from sub-Saharan Africa. The region ranks ahead of Latin America and the Caribbean and the Middle East and North Africa on the political empowerment subindex having closed 17% of its gender gap.

Lesotho (14) continues to hold the top spot in the Sub-Saharan region, despite having lost five places in the ranking due to small deteriorations in the category of wage equality for similar work and estimated earned income. Lesotho scores are above the global average on all subindicators and is the only country from the region that has closed the gender gap in both the education attainment and health and survival subindexes. Lesotho is the third-best performer on the legislators, senior officials and managers indicator and the top performer on the literacy rate and enrolment in secondary education. Lesotho remains among the highest climbers within the 111 countries that have been included in the *Report* since 2006. Next in the region's rankings is **South Africa** (16) which loses two places compared to last year and is the only other sub-Saharan Africa country in the top 20. South Africa maintains the top spot in the region on political empowerment, holding the seventh position on this subindex and the fourth on the women in parliament indicator.

Mozambique follows next (23), gaining three places in the ranking due to improvements in the education subindex. Mozambique ranks ninth on the economic participation and opportunity subindex due to high scores on the labour force participation and estimated earned income indicators. Mozambique is also the region's best performer regarding the years with female head of state indicator. **Burundi** (24) and **Uganda** (28) follow next. Although Burundi's overall score has improved, it maintains the same position in the ranking. Burundi ranks 1st overall on labour force participation. Uganda moves up one spot due to improvement in the estimated earned income. This gain offsets the loss in secondary education. Uganda is included in the top ten performers on the wage equality survey.

The next spot in the ranking is occupied by **Cape Verde** (35), which is included in the Index for the first time. Cape Verde is among the top twenty countries overall on the enrolment in secondary education and women in ministerial positions indicators. Cape Verde is followed by **Malawi** (36), **Namibia** (41) and **Tanzania** (46). Malawi gains 29 places this year. This is mainly due to the fact that there are no data for the legislators, senior officials and managers indicator this year. Malawi is among the highest climbers of the 111 countries that have been included in the *Report* since 2006 and ranks fifth on the economic participation and opportunity subindex. Namibia slips from the 32nd to the 41st position this year, primarily due to losses in the economic participation and opportunity subindex. Tanzania moves up thirteen spots, driven by gains in the economic and education subindexes.

The next spots in the regions are occupied by **Madagascar** (58), **Ghana** (71), **Kenya** (72) and **Botswana** (77). Madagascar gains thirteen places. This gain can be attributed to an increase in wage equality, an increase in the percentage of women in parliament and in ministerial positions. Madagascar holds the fifth position overall on the labour force participation indicator. Ghana falls one place in the ranking this year. It holds the eighth overall position on the wage equality indicator, whereas it held the 26th position on that indicator last year. Kenya gains 27 places partially due to the fact that there is no data for the legislators, senior officials and manager indicator. Botswana falls eleven places. This is mainly a result of two factors: legislators, senior officials and managers and professional and technical workers indicators are not present this year for Botswana and that ratios for enrolment in primary, secondary and tertiary education have improved from last year.

Senegal (90), **The Gambia** (93) and **Mauritius** (98) occupy the next places in the ranking. Senegal is the second highest-ranking country on the enrolment in primary education indicator. The Gambia moves down sixteen places this year due to a significant decrease in the enrolment in secondary education ratio. Mauritius slips down three spots relative to its performance last year partially due to a decrease in women in ministerial positions. **Burkina Faso** (104) gains eleven places this year, primarily due to an improvement in the education attainment subindex. No data for legislators, senior officials and managers and professional and technical workers have been included this year due to lack of recent statistics. Burkina Faso is among the ten lowest performing countries on literacy rates and enrolment in tertiary education.

Burkina Faso is followed by **Nigeria** (110), **Cameroon** (112) and **Zambia** (114). Nigeria has seen an improvement in the overall rankings, rising from the 120th in 2011 to the 110th place in 2012. Nigeria's leap in the rankings is boosted by an increase in the estimated earned income ratio and an increase in the number of women in ministerial positions, which rose from 10% to 28%. Cameroon moves

up in the rankings from the 119th to 112nd place, mainly driven by improvements in the estimated earned income. This important increase offsets the deterioration in the ratio of secondary education enrolment. Zambia loses eight places compared to last year. Next in the rankings are **Benin** (117) and **Ethiopia** (118). Benin gains eleven places in the rankings this year, partly as there is no data for legislators, senior officials and managers and partly the result of an improvement in the percentage of women holding ministerial positions (from 13% to 31%). Ethiopia loses two places this year.

Mali (128), **Côte d'Ivoire** (130) and **Chad** (133) remain the lowest-ranking Sub-Saharan Africa countries in the Index. All three countries are part of the five lowest performing group of countries on the education attainment subindex. Mali gains four places and Côte d'Ivoire's ranking does not change this year. Finally, Chad is again this year the lowest-ranking country in the sub-Saharan Africa region.

GENDER GAPS, ECONOMIC PERFORMANCE AND POLICY IMPLICATIONS

The most important determinant of a country's competitiveness is its human talent—the skills, education and productivity of its workforce—and women account for one-half of the potential talent base throughout the world. Closing gender gaps is thus not only a matter of human rights and equity; it is also one of efficiency. Figure 7 shows a plot of the Global Gender Gap Index 2012 scores against the Global Competitiveness Index 2012–2013 scores. Figure 8 plots the Global Gender Gap Index 2012 scores against GDP per capita. Figure 9 shows the relationship between the Global Gender Gap Index and the Human Development Index. The graphs confirm a correlation between gender equality and the level of competitiveness, GDP per capita and human development.

The correlation among competitiveness, income and development and gender gaps is evident despite the fact that the Global Gender Gap Index (unlike other gender indexes) explicitly eliminates any direct impact of the absolute levels of any of the variables (e.g. life expectancy, educational attainment, labour force participation) used in the Index. While correlation does not prove causality, it is consistent with the theory and mounting evidence that empowering women means a more efficient use of a nation's human talent endowment and that reducing gender inequality enhances productivity and economic growth.

Over time, therefore, a nation's competitiveness depends, among other things, on whether and how it educates and utilizes its female talent. In Figure 10, we plot the educational attainment subindex against the economic participation and opportunity subindex. The data in the Global Gender Gap Index reveals four broad groups of countries: (1) countries that are generally closing education gaps and show high levels of women's economic

participation, (2) countries that are generally closing education gaps but show low levels of women's economic participation, (3) countries that have large education gaps as well as large gaps in women's economic participation and (4) countries that have large education gaps but display small gaps in women's economic participation.

In the first broad group are countries that have made investments in women's health and education and generally see the returns on this investment in terms of women's economic and political participation. These countries include the Nordic countries, the United States and the Philippines. These countries have not, however, fully closed economic and participation gaps—in particular, the gaps in senior positions, wages and leadership levels still persist. According to research, the reduction in the male-female employment gap has been an important driver of European economic growth in the last decade and closing this gap would have massive economic implications for developed economies, boosting US GDP by as much as 9% and euro zone GDP by as much as 13%.¹² There are several potential drivers behind this. Innovation requires new, unique ideas—and the best ideas flourish in a diverse environment. There is evidence to show that companies benefit by successfully integrating the female half of the available talent pool across their internal leadership structures,¹³ that women may have a propensity for making more inclusive, informed decisions and for engaging in less risky behaviour and that gender-equal teams may be more successful. In addition, in many countries women now account for more than half of the college and university graduates. As they begin to take up half of entry-level positions in several industries, as evident in the data from several OECD countries, it is a loss for companies if these highly skilled women are forced to choose between work and family at later stages of their career.¹⁴ Business leaders and policy-makers must therefore ensure that, in addition to removing barriers to women's entry to the workforce, they put in place practices and policies that will provide equal opportunities for rising to positions of leadership within companies.

In the second broad group are countries that have made the key investments in women's education but have generally not removed barriers to women's participation in the workforce and are thus not seeing returns on their investments in the development of one half of their human capital. This group includes Japan, Qatar, Mexico and Saudi Arabia. These countries have an untapped but educated talent pool and would have much to gain through women's greater participation in the workforce. A study has shown that closing the gap between male and female employment would boost Japanese GDP by as much as 16%. A report by the United Nations Economic and Social Commission for Asia and the Pacific Countries found that restricting job opportunities for women is costing the region between US\$ 42 and US\$ 46 billion a year.¹⁵ Research by the World Bank demonstrates that similar restrictions have

Note: Old-age dependency ratio is population aged 65+ per 100 population aged 15–64.

also imposed massive costs throughout the Middle East, where decades of substantial investment have dramatically reduced the gender gap in education but the gender gap in economic opportunity remains the widest in the world.¹⁶ Furthermore, there is new research showing that the combined impact of growing gender equality, the emerging middle class and women's spending priorities will lead to rising household savings rates and shifting spending patterns. Industry in these countries—particularly in sectors such as food, healthcare, education, childcare, apparel, consumer durables and financial services—will need to be prepared for these changes.¹⁷

In the third and fourth groups, the most basic investments in girls' and women's education still need to be made, and fundamental rights—including legal frameworks around inheritance, reproductive rights and violence—are often inadequate. Research demonstrates that investment in girls' education has significant multiplier effects: it reduces high fertility rates, lowers infant and child mortality rates, lowers maternal mortality rates, increases women's labour force participation rates and earnings and fosters educational investment in children.¹⁸ These outcomes not only improve the quality of life, they also foster faster economic growth and development. A substantial body of literature has shown that investing in girls' education is one of the highest-return investments a developing economy can make. The third group contains countries such as Yemen, Pakistan and Nepal, which have both large education gender gaps as well as economic ones.

The fourth group contains countries such as Mozambique, Burundi, Gambia and Benin, which have large education gender gaps but small economic ones primarily due to high levels of participation by women in low-skilled work. For these countries, closing education gaps will remain an important factor over time. However, compared with the third group, women in these countries have greater access to income and decision-making. Research has shown that women are more likely to invest a larger proportion of their household income than men in the education and health of their children. There is also some evidence from India to suggest that women in local government roles make decisions with better outcomes for communities than men when charged with budget decisions;¹⁹ they also appear to be more competent representatives than men, obtaining more resources for their constituencies despite having significantly lower education and relevant labor market experience.²⁰

Many of the 135 economies covered by the Index are faced with rapidly ageing populations. Figure 11 plots the old-age dependency ratio projections for 2030 against the economic participation and opportunity subindex scores of 2011, revealing those countries among the set with high old-age dependency ratios that have low economic participation gaps and those that have high economic participation gaps. In countries where it is relatively easy for women to combine work with having children, female employment and female fertility both tend to be higher. Policies that allow women to combine work and family may

thus play a role in addressing the future problems posed by ageing populations.²¹

The magnitude and particulars of gender gaps in countries around the world are the combined result of various socioeconomic and cultural variables. The closure or continuation of these gaps is intrinsically connected to the framework of national policies in place. New research is required to understand which policies are most effective in closing gender gaps and whether these are transferrable to other replicable and scalable. This year, we have provided supplementary information on policy variables in the Country Profiles. In addition, over the last year, we have conducted a policies survey with ministries responsible for women in the 135 countries covered in this *Report*. The preliminary results from 74 countries are presented in Appendix E.

TRACKING THE GENDER GAP OVER TIME

The Global Gender Gap Index was first published in 2006 with a view to creating a comprehensive gender parity index that is able to track gaps over time relative to an equality benchmark, thus providing information on a country's progress relative to itself as well as to other countries.

Based on the seven years of data available for the 111 countries that have been part of the *Report* since its inception, we find that the majority of countries covered have made progress on closing gender gaps. Figure A1 in Appendix A displays changes over time within the four subindexes. In 2006, 14% of the global political empowerment gap had been closed; in 2012, almost 20% of this gap has been closed. In 2006, 56% of the economic participation gap had been closed; in 2012, almost 60% of this gap has been closed. In 2006, almost 92% of the educational attainment gap had been closed; in 2012, almost 93% of this gap has been closed. On health and survival, however, there has been a small deterioration between 2006 and 2012, from 97% to 96%. Figure A2 displays changes over time on the Index score across different regions. All regions have shown improvements over the last seven years except Europe and Central Asia.

Table A1 in Appendix A displays the full list of 111 countries covered between 2006 and 2012 and ordered according to the percentage change in their score, relative to their score in 2006. Figure A3 displays these countries in a scatter plot divided into four quadrants: countries that were performing above the median score in 2006 and have shown progress between 2006 and 2012, countries that were performing above the median score in 2006 and have regressed between 2006 and 2012, those that were performing below the median score in 2006 and have shown progress between 2006 and 2012 and those that were performing below the median score in 2006 and have regressed between 2006 and 2012. Overall, 88% of countries made progress between 2006 and 2012 while 12% have either deteriorated or remain unchanged.

However, the pace of change is slow. Only nine countries have improved by 10% or more while 75 have improved less than 5% during this time period.

We were able to calculate the Global Gender Gap Index backwards to the year 2000 for a limited set of countries in order to take a longer-term look at trends. Table A2 in Appendix A displays the Global Gender Gap Index 2000–2012 for 39 countries where the relevant data were available. In all countries there was a net improvement in scores across the 12 years, with the exception of the Slovak Republic. Switzerland, Belgium, Finland, Ireland and Costa Rica show the largest absolute increases in score, amounting to relative changes of more than 15% when compared with their performance in the year 2000.

In the Country Profiles section, readers can explore trends over the last seven years on both the overall Index scores and ranks and the four subindex scores and ranks. It is important to note that there are gaps in international databases and not all countries have information available for all variables across all seven years, nor are all data updated on an annual basis for each country by the international organizations that serve as our primary sources of data.

CONCLUSION

The Global Gender Gap Report 2012 provides a comprehensive overview of current performance and progress over the last six years. On average, over 96% of the gap in health outcomes, 93% of the gap in educational attainment, 60% of the gap in economic participation and 20% of the gap in political empowerment has been closed. No country in the world has achieved gender equality. The four highest ranked countries—Iceland, Finland, Norway and Sweden—have closed between 80 and 86% of their gender gaps, while the lowest ranked country—Yemen—has closed a little over half of its gender gap.

The Global Gender Gap Index was developed in 2006 partially to address the need for a consistent and comprehensive measure for gender equality that can track a country's progress over time. This edition of *The Global Gender Gap Report* reveals the trends observed in the data over the past seven years and seeks to call attention to the need for more rapid progress in closing gender gaps. Out of the 111 countries covered in 2006–2012, 88% have improved their performance, while 12% have widening gaps. In some countries, progress is occurring in a relatively short time, regardless of whether they are starting out near the top or the bottom of the rankings, and independent of their income. Countries such as Iceland, Bolivia, Switzerland, Saudi Arabia, Lesotho, Yemen and others have made much progress relative to their own situation in 2006. Relatively few countries have regressed relative to their own scores. While some of these are relatively high-ranking countries such as Sweden and Sri Lanka, there has also been significant deterioration in

countries such as Mali, Jordan, Kuwait and Zambia, which were already at the lower end of the rankings.

The Index points to potential role models by revealing those countries that—within their region or their income group—are leaders in having divided resources more equitably between women and men than other countries have, regardless of the overall level of resources available. The detailed Country Profiles allow users to understand not only how close each country lies relative to the equality benchmark in each of the four critical areas, but also provides a snapshot of the legal and social framework within which these outcomes are produced.

The Index continues to track the strong correlation between a country's gender gap and its national competitiveness, income and development. A country's competitiveness depends on its human talent—the skills, education and productivity of its workforce. Because women account for one-half of a country's potential talent base, a nation's competitiveness in the long term depends significantly on whether and how it educates and utilizes its women. Four broad groups of countries are evident in the Index: (1) countries that are generally closing education gaps and show high levels of women's economic participation, (2) countries that are generally closing education gaps but show low levels of women's economic participation, (3) countries that have large education gaps as well as large gaps in women's economic participation and (4) countries that have large education gaps but display small gaps in women's economic participation.

This *Report* highlights the message to policy-makers that, in order to maximize competitiveness and development potential, each country should strive for gender equality—that is, should give women the same rights, responsibilities and opportunities as men. The Index does not seek to set priorities for countries but rather to provide a comprehensive set of data and a clear method for tracking gaps on critical indicators so that countries may set priorities within their own economic, political and cultural contexts. We are hopeful that the information contained in the *Global Gender Gap Report* series will also serve as a basis for further research that will facilitate a clearer understanding of the policies that are successful and those that are not, particularly as increasing numbers of policy-makers, employers and civil society seek out best practices and role models to incorporate gender equality into their practices and policies.

NOTES

- 1 See Greig et al. "The Gender Gap Index 2006".
- 2 This ratio is based on what is considered to be a "normal" sex ratio at birth: 1.06 males for every female born. See Klasen and Wink, "Missing Women: Revisiting the Debate".
- 3 This ratio is based on the standards used in the UN's Gender-Related Development Index, which uses 87.5 years as the maximum age for women and 82.5 years as the maximum for men.

- 4 A first attempt to calculate the gender gap was made by the World Economic Forum in 2005; see Lopez-Claros and Zahidi, *Women's Empowerment: Measuring the Global Gender Gap*. The 2005 Index, which was attempting to capture women's empowerment, used a "feminist" scale that rewarded women's supremacy over men (highest score is assigned to the country with the biggest gap in favour of women).
- 5 The weights derived for the 2006 Index were used again this year and will be used in future years to allow for comparisons over time.
- 6 This is not strictly accurate in the case of the health variable, where the highest possible value a country can achieve is 0.9796. However, for purposes of simplicity we will refer to this value as 1 throughout the chapter and in all tables, figures and Country Profiles.
- 7 Because of the special equality benchmark value of 0.9796 for the health and survival subindex, it is not strictly accurate that the equality benchmark for the overall index score is 1. This value is in fact $(1 + 1 + 1 + 0.9796) / 4 = 0.9949$. However, for purposes of simplicity, we will refer to the overall equality benchmark as 1 throughout this chapter.
- 8 Since the variables in the subindexes are weighted by the standard deviations, the final scores for the subindexes and the overall Index are not a pure measure of the gap vis-à-vis the equality benchmark and therefore cannot be strictly interpreted as percentage values measuring the closure of the gender gap. However, for ease of interpretation and intuitive appeal, we will be using the percentage concept as a rough interpretation of the final scores.
- 9 A population-weighted average of all scores within each region was taken to produce these charts.
- 10 Please note that we have modified our regional classifications from those used in previous editions of the *Report*.
- 11 Due to the current situation in Syria the Executive Opinion Survey was not carried out this year and the results thus do not include this variable in 2012.

Appendix A: Tracking the Gender Gap over Time

The seven-year dataset for the Global Gender Gap Index indicates progress across all subindexes (Figure A1) except Health and Survival, and across regions (Figure A2)

except Europe and Central Asia. Table A1 shows the biggest gainers and losers out of the 111 countries covered in the report between 2006 and 2012.

Figure A1: Global Gender Gap Index by subindex, 2006–2012

Source: Global Gender Gap Indexes, 2006–2012; scores are weighted by population. Population data from the World Bank's *World Development Indicators (WDI)* online database 2011, accessed July 2012.

Details of regional classifications in Appendix B.

Figure A2: Global Gender Gap Index by regions, 2006–2012

Source: Global Gender Gap Indexes, 2006–2012; scores are weighted by population. Population data from the World Bank's *World Development Indicators (WDI)* online database 2011, accessed July 2012.

Details of regional classifications in Appendix B.

Appendix A: Tracking the Gender Gap over Time (cont'd.)

Table A1: Change in score (2006–2012) as a percentage of 2006

Country	2006 score	2012 score	Change in score (2006–2012)	Percentage change relative to 2006 score
Nicaragua	0.6566	0.7700	0.1134	17.3
Bolivia	0.6335	0.7220	0.0885	14.0
Ecuador	0.6433	0.7210	0.0777	12.1

Appendix A: Tracking the Gender Gap over Time (cont'd.)

Figure A3 plots the percentage change in score, relative to the actual score in 2006, for the same set of countries. The median score is 0.666. Finally, Table A2 presents the historical calculation made for the Index between 2000 and 2005, along with calculations from the published Index in

recent years for 39 countries for which we were able to find complete data as far back as the year 2000. For a more detailed analysis by subindex and the calculation method, please refer to the Global Gender Gap Index 2007.

Figure A3: Percentage change relative to the Global Gender Gap Index 2006 score

Note: Income classifications are taken from the World Bank, which classifies economies into four income categories based on 2011 GNI per capita (current US\$), high income, upper-middle income, lower-middle income and low income.

* New countries 2012

Appendix C: Regional and Income Group Classification, 2012

The chart below shows the spread of the minimum and maximum values for each of the 14 variables of the Global Gender Gap Index. Each indicator is presented with its own scale of the minimum possible value and maximum possible value. For wage equality for similar work, this is a scale of 1 (worst value for women) to 7 (best value for women). For estimated earned income, the maximum value is 40,000 US dollars; this is the benchmark used in the calculation of the Index. For sex ratio at birth (f/m), the maximum value is a ratio of 0.944; this is the benchmark used in the calculation of the Index. For healthy life expectancy, the maximum value listed is that of the country with the best performance

on this indicator (Japan; 78 years); this is not the benchmark used in the calculation of the Index (which is of 1.06). For years with female head of state, the minimum value is 0 years and the maximum value is 50 years. All other variables are expressed as percentages with a minimum value of 0% and a maximum value of 100%.

Male values are represented by black bars; female values, by blue bars. In the case of variables representing a combined measure of male and female situations (wage equality for similar work and sex ratio at birth), a grey bar is used.

Figure C1: Female and male ranges for Global Gender Gap Index 2012 indicators

* New countries 2012

Appendix E: Policy Frameworks for Gender Equality

National policy frameworks play a key role in influencing the magnitude and scope of gender gaps. Most countries around the world have instituted some form of national machinery to promote gender mainstreaming across various policy areas. Regional variations in the size and type of gender gaps correspond to different mechanisms established at country and regional level for addressing these specific gaps.

In order to complement the data presented in this *Report* and to build a more comprehensive picture of the policy environment, in 2011 the World Economic Forum conducted a survey of national policy frameworks relating to parental leave, availability of childcare, type of taxation and workplace equality. In light of the positive feedback received by the survey last year, the World Economic Forum has worked in close collaboration with various ministries around the world to expand the size of the current database for the 2012 edition of the *Global Gender Gap Report*, reaching a total of 74 surveyed nations.

The survey targeted ministries of women's affairs or ministries with similar portfolios (e.g. ministries of social development, ministries of family policies). It was carried out by expert officers within the ministries, who in many cases collaborated with other applicable ministries in the country (e.g. ministries of finance or of welfare) for questions that cut across the domain of responsibility of more than one ministry.

This year's edition of the survey replicates the 2011 version and includes approximately 30 questions. Those questions in the 2011 survey that had not received a critical mass of replies from respondents and that were consequently not considered in the 2011 edition of the Appendix were removed from this year's survey.

Four relevant themes are covered by the survey: family leave, childcare assistance, taxation system and equality and work. Work-family policies normally cut across these four areas of intervention, with important effects on both women (e.g. participation rates, wages) and employers (e.g. productivity).

- **Family leave:** Maternity, paternity and parental leave—or any other type of additional shared leave—are closely associated with women's economic participation in many parts of the world and are thus an important element of policies aimed at a more efficient use of a country's human capital pool.¹
- **Childcare assistance:** Childcare is an important factor in allowing women to reconcile professional

and family obligations because women tend to bear the majority of the caregiving responsibilities in the majority of countries. For example, a well-established daycare system can be a long-term investment that supports women in employment, thereby improving the efficiency of labour markets. In some parts of the developed world, research has shown that daycare assistance may even impact fertility rates.²

- **Taxation system:** Tax legislation may contain potentially discriminatory provisions that treat men and women differently.³ For example, gender-biased taxation might alter the disposable income available to men and women in a family and may thus have implications for the economic and social decision-making at the household level.
- **Equality and work:** Legislative structures may help prevent gender-based discrimination in society and create an ecosystem of support for women through, among other policies, obligatory and voluntary quotas in public and private entities, targeted subsidies to female businesses and supervisory bodies monitoring the implementation of national policies.

The full set of survey questions is displayed in Box 1. Given the substantial differences of national policy systems around the world, the survey was designed to present both quantitative and qualitative data. The survey's goal was solely to provide country-level information on national policies with possible gender implications; by no means it aims to benchmark countries on policy-making criteria.

In addition to the 59 countries already incorporated in the World Economic Forum database last year, this edition of the *Global Gender Gap Report* sees the inclusion of 15 additional countries, for a total of 74 countries covered: Albania, Armenia, Australia, Austria, Azerbaijan, Bahamas, Barbados, Belgium, Botswana, Brazil, Brunei Darussalam, Bulgaria, Canada, Chile, Colombia, Costa Rica, Croatia, Cyprus, Czech Republic, Denmark, Dominican Republic, Estonia, Ethiopia, Finland, Germany, Ghana, Greece, Iceland, Ireland, Israel, Jamaica, Japan, Korea, Rep., Kuwait, Latvia, Lebanon, Lesotho, Liberia, Lithuania, Luxembourg, Macedonia FYR, Madagascar, Malaysia, Mali, Malta, Mauritius, Mexico, Moldova, Namibia, Netherlands, New Zealand, Nigeria, Norway, Oman, Paraguay, Peru, Philippines, Portugal, Romania, the Russian Federation, Singapore, the Slovak Republic, Slovenia, Spain, Suriname, Sweden, Switzerland, Turkey, Uganda, the United

This appendix was written by Saadia Zahidi and Silvia Magnoni, World Economic Forum.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Box 1: Survey Questions

CONTACT INFORMATION

- Name of the country
- Name of the ministry
- Respondent's name
- Department name

FAMILY LEAVE

- **During the first year after a child's birth:**¹
 - Does your country provide mandatory maternity leave and how long is it? (Mothers only: Leave from work that a woman is entitled to take before, at and after the time that she gives birth)
 - Does your country provide paternity maternity leave and how long is it? (Fathers only: Leave from work that a man is entitled to take after the birth of a child or within a short period thereafter, simultaneously with the mother's leave)
 - Does your country provide any remaining leave (i.e. parental leave) that can be used by either parent to take care of an infant, and how long is it?
- **What is on average the percentage of wage paid during:**
 - Maternity leave? *Please explain if the payment varies according to specific variables (i.e. length of the period of leave, collective agreements, ceilings).*
 - Paternity leave? *Please explain if the payment varies according to specific variables (i.e. length of the period of leave, collective agreements, ceilings).*
 - Any other additional shared leave (i.e. parental leave, home-care leave, family leave)? *Is it paid or unpaid? Please explain if there are differences between the mother and the father's pay percentage.*

- Who is the provider (social security and/or employer, other) of the wage/benefits disbursed under maternity and/or paternity and/or shared leave coverage?
- Are all organizations and/or sectors in your country subjected to these policies (i.e. private sector, public sector, self-employed parents)?
- If not, please specify which organizations and/or sectors are not impacted by these policies and/or present specific exceptions.
- When were maternity leave and paternity leave² rights introduced in your country?

CHILDCARE ASSISTANCE

- **Which of these seven options does your country offer?**
 - Public daycare assistance with allowance or subvention
 - Public daycare assistance without allowance or subvention
 - Private daycare assistance with allowance
 - Private daycare assistance without allowance
 - Homecare assistance³ with allowance
 - Homecare assistance without allowance
 - Informal family assistance⁴ with no allowance. Which category of assisting family members is contributing to the majority of day care duties?

TAXATION SYSTEM

- Please indicate the type of tax system available at the national level: individual, income-splitting,⁵ joint filing or other tax system.
- Does your government provide any childcare deductions or child-related allowances to couples with children?
- If so, are childcare deductions or any other child-related allowances allocated to the mother, to the father or to both?

(Continued on next page)

Arab Emirates, the United Kingdom, the United States, Uruguay and Vietnam. The survey collection process was implemented over a three-month period whereby the World Economic Forum worked in close collaboration with relevant ministries for the compilation of data. When surveys were partially completed and when appropriate supplemental information was available through other sources, internal research was carried out to complete the database.

For this edition of the *Global Gender Gap Report*, an additional regional feature has been integrated in the elaboration of data. Country responses are presented following a regional breakdown, when applicable, to provide readers with a clear overview of trends, preferences and potential patterns across six regions in the world. In the backdrop of the profound socio-economic

and political transformations that many regions have experienced in the past years, the regional focus hereby portrayed presents a snapshot of the region-by-region status quo of legislative frameworks for gender equality and intends to serve as a tool for further analysis and understanding of regional developments and challenges.

Figure E1 displays the accumulated length of time available in the form of leave to the mother, to the father or to either parent. The listing of countries is arranged by six world regions. In order to create this chart we have interpreted some of the data in order to harmonize and compare within countries. However, comparisons should not be made across countries as data are not strictly comparable across countries. All leave available to one specific parent are grouped under one category, independently of the nature of such leave (e.g. only

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Box 1: Survey Questions (cont'd.)

EQUALITY AND WORK

- **Reply to each of the following questions, indicating, when applicable, the relevant constitutional articles or legislative provisions:**

- Does your country have any legislation which prohibits discrimination on grounds of gender?
- Does your country have any legislation which stipulates specific gender-neutral practices at the workplace (e.g. equal pay for the same work, equal opportunities for recruitment, training, career advancement)? Does it apply to both the private and public sector?
- Does your country have any legislation which ensures a minimum mandatory percentage of both genders on corporate boards? If relevant, indicate the mandatory percentage.
- Does your country have any legislation which ensures a minimum mandatory percentage of both genders in parliament/other political assemblies at national, regional and local level? If relevant, indicate the mandatory percentage.
- Does your country have an authority specifically deemed to monitor the implementation of the above-mentioned legislation and/or institute legal proceedings for claims and possible compensation? If relevant, indicate the name of the authority.

- Does your country have any gender-equality labels available at the national level? If relevant, indicate the type of label.
- Does your country provide allowances such as tax-free allowances or any sort of subventions to female entrepreneurs? If relevant, indicate the type(s) of allowances/subventions and the number of women entrepreneurs who have benefited from these allowances in 2011 (or any other year, for which statistics are available).

Note: The grey highlights indicate those questions in the survey that have not received a critical mass of replies from respondents and that are consequently not considered in this Appendix.

NOTES

- 1 If your country has a mandatory offer going beyond the first year after a child's birth, please explain further.
- 2 The question refers to the year of introduction of maternity and paternity leave legislation in your country, not to the overall (and usually antecedent) introduction of maternity and paternity rights.
- 3 One parent stays home. The other parent is working.
- 4 Daycare provided by members of the family. Both parents are working.
- 5 Income-splitting is a form of family taxation, where income can be transferred to family members with more favourable tax brackets (with limits defined by attribution rules).

maternity leave and parental leave available to the mother have been grouped in the same category). Child sick leave, breastfeeding leave, annual leave, vacation leave and other leave of a similar nature are not accounted for in the figure. Both paid and unpaid leave were taken into account. The calculations include ordinary leave only; special cases (e.g. adoption, difficult pregnancy, more than one child) are not considered. When data are provided in days and no specific indication is given by respondents (calendar days vs. working days), we assume that numbers refer to working days. When a country presents different figures for the same leave in the public and in the private sector, the sector with the highest figure is taken into account. In the case of federated states, only federally mandated provisions are included in the computation. Countries without federally mandated legislation for maternity/paternity/parental leaves are thus not considered (e.g. the United States). When the application of these criteria did not allow for clear interpretation, countries were excluded (e.g. Moldova).

Table E1 displays the complete set of responses obtained in relation to family leave, clustered by region.

Figures E2 through E8 show the prevalence of different types of childcare systems among the 74 countries covered in the survey. A region-by-region breakdown is also provided.

Table E2 displays the responses obtained on questions relating to the country's type of taxation system. Countries are listed by region. Individual taxation tends to be most favourable for women; joint taxation tends to be least favourable. Income-splitting is a form of family taxation where income can be transferred to family members with more favourable tax brackets (with limits defined by attribution rules).

Table E3 and **Figures E9 through E15** display the results on all equality- and work-related questions in the survey. For Table E3, regional groupings are reported.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Figure E1: Length of accumulated leave available to parents, by region

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
ASIA AND THE PACIFIC			
Australia	52 weeks, 18 weeks at national minimum wage.	Industrial instrument entitlement for paid maternity leave: 100% of pre birth earnings. Parental Leave Pay: National Minimum Wage.	3 weeks, concurrent to mother's leave.
Brunei Darussalam	15 weeks or 105 days of leave that must be taken two weeks before the expected delivery date.	100	No.
Japan	Up to 6 weeks before birth, 8 weeks after birth.	Minimum 2/3 of working salary (approximately 66%).	No. However, spousal maternity leave available at corporate level 50 (minimum).
Korea, Rep.	90-day maternity leave before and after birth. The postpartum period shall account for more than 45 days of the entire period of maternity leave.	100, up to a ceiling.	3 days.
Malaysia	Public sector: 8 weeks up to 12 weeks, private sector: 8 weeks.	100	Public sector: 1 week, private sector: none.
New Zealand	14 weeks, 10 days unpaid special leave during pregnancy.	100, up to a ceiling.	2 weeks; eligible male employees may also qualify for 14 weeks paid parental leave.
Philippines	8 weeks.	Private sector: 100%, public sector: 100% (2 or more years of service) or 50% (1 to 2 years of service).	1 week after legitimate wife's childbirth.
Singapore	12 to 16 weeks depending on the employee's social security coverage. The last 4 to 8 weeks can be taken flexibly over a 12-month period from the child's birth.	Statutory maternity leave of 12 weeks: 100% for the first 8 weeks, voluntary payment from the employer for the last 4 weeks. Third child and above: for all 12 weeks the maternity payment from the employer is voluntary. Government-Paid Maternity Leave of 16 weeks: 100% for the first 8 weeks (paid by the employer), 100% -capped at a specific amount per 4 weeks- for the remaining 8 weeks (paid by the Government). Third child and above: 100% -capped at a specific amount per 4 weeks- for all 16 weeks (paid by the Government).	No statutory entitlement; 3 days for public sector fathers on birth of the first 4 children.
Vietnam	4-6 months of paid maternity leave, depending on the nature of the work, to be taken before and after the time of giving birth. As of 1 May 2013, 6 months paid maternity leave.	100. Female workers are also entitled to an additional lump sum of 2 times the general minimum wage when giving birth.	No.

Note: Blank cells mean that data are not available or not applicable.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Table E1: Maternity, paternity and additional shared leaves (cont'd.)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
ASIA AND THE PACIFIC			
Australia	Industrial instrument entitlement for paid paternity leave: 100% of pre birth earnings.	Up to 52 weeks, unpaid, to be shared between the mother and the father. An employee is entitled to request up to an additional 12 months of unpaid parental leave, providing s/he has already taken (or intends to take) 12 months' unpaid parental leave.	100
Brunei Darussalam	—	No. However, both parents can take leaves to take care of their infant and a special leave is given to parents to take care of their sick children. Annual paid leave is available to both parents, with a duration ranging from a minimum of 22 days/year to a maximum of 42 days/year (civil servants).	Annual leave is paid without differences between mothers and fathers.
Japan	Minimum 50%.	Childcare leave: one year to each parent that can be taken simultaneously. If fathers take childcare leave within 8 weeks after birth, they can take childcare leave again.	Minimum 50%.
Korea, Rep.	Unpaid.	Parental leave: 1 year, until the child is 6. In case of a dual income couple, each parent is entitled to a 12-month parental leave before the child enters elementary school. They can opt for the divided use of parental leave once only.	40
Malaysia	100	Public sector: period of leave determined by the officer. Not more than 5 years for the entire service period.	Unpaid leave and half paid leave.
New Zealand	Unpaid.	52 weeks including 14-week paid parental leave, which may be taken by either partner or shared by both partners.	Parental leave is paid.
Philippines	100	1 week (solo parents); special leave privileges for government workers.	100
Singapore	100	Various leaves available according to security coverage: 6 days of unpaid infant care leave per year for each parent until the child turns 2 years old; 2 to 6 days of paid childcare leave per year for each parent, regardless of the number of children, until the child turns 7 years old. Public sector: for either parent, up to 5 days of paid childcare sick leave per year for each child below 12 years of age, capped at 15 days per year if the officer has 3 or more children.	Infant care leave: unpaid, childcare leave: 100%, with different conditions according to social security coverage.
Vietnam	—	Parents can take leave to take care of a sick infant: maximum 20 days if the child is under three years old; 15 working days if the child is between three years old and seven years old.	Paid.

(Cont'd.)

Appendix E: Policy Frameworks for Gender Equality *(cont'd.)*

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
LATIN AMERICAN AND THE CARIBBEAN			
Bahamas	Minimum 12 weeks.	33 -1/3% of insurable wage payable by the National Insurance Board. 56 -2/3% of wages payable by the employer.	—
Barbados	12 weeks. In public service, it is practice for maternity leave to be granted for a period of up to 4 months.	—	—
Brazil	120 days of maternity leave. In 2008, a law was passed that allows the extension of the period to 180 days. A great part of the employers in the public sector and the larger corporations have adhered to this extension. Breastfeeding leave available until the baby is six months old: two half-hour periods during the work day.	100	5 days.
Chile	6 weeks before, 12 weeks after birth. Breastfeeding maternity leave is also available.	100, up to a ceiling.	5 working days.
Colombia	14 weeks, of which 2 weeks before birth. Breastfeeding maternity leave is also available.	100	8 days.
Costa Rica	4 weeks before, 12 weeks after birth.	100	—
Dominican Republic	6 weeks before and 6 weeks after birth.	100	—
Jamaica	Up to 8 weeks. Leave without pay for an additional period not exceeding 65 working days. In particular cases, a grant of unpaid leave can be authorized for periods in excess of 65 working days.	100	—
Mexico	6 weeks before and 6 weeks after birth.	100% (50% in case of leave extension).	Federal law does not provide paternity leave though some federal institutions have related provisions.
Paraguay	Minimum 12 weeks. Breastfeeding leaves are available (two half-hour breaks per day).	100	3 days.
Peru	90 calendar days, 45 days pre-partum and 45 days post-partum. The worker has the possibility of partially or fully deferring her pre-partum leave to accumulate these days for the post-partum period. Special provisions for multiple births and premature childbirth. Breastfeeding leaves are available.	100 (average of daily wages during the last 12 months of affiliation to the social security system).	4 consecutive working days between childbirth and date when mother/newborn are discharged from medical center.

Note: Blank cells mean that data are not available or not applicable.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Table E1: Maternity, paternity and additional shared leaves (cont'd.)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
LATIN AMERICAN AND THE CARIBBEAN			
Bahamas	—	Family leave, unpaid, for a period not exceeding one week/year. Mothers enjoy an additional leave (six weeks) in case of illness following the birth of the child.	Unpaid.
Barbados	—	—	—
Brazil	100	Public servants (both male and female) are entitled to License due to illness of a family member. The criteria and periods are set by the governing bodies of each federal level.	Paid.
Chile	100	Mothers and fathers share a paid leave in case of disease of a one-year old or younger child. Breastfeeding and child feeding leave could be used by the father in the case of the mother's death.	—
Colombia	100	—	—
Costa Rica	—	—	—
Dominican Republic	—	—	—
Jamaica	—	—	—
Mexico	100, where paternity leave is available.	No, but mothers and fathers have 6 working days/ semester for maternal/parental care.	—
Paraguay	100	—	—
Peru	100	—	—

(Cont'd.)

Appendix E: Policy Frameworks for Gender Equality (*cont'd.*)

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
Suriname	Public sector: 6 weeks before and 6 weeks after birth; private sector: no mandatory maternity leave. In general, maternity leave is stipulated in collective labor agreements, in which case employees are bound by the provisions in the agreement.	100	—
Uruguay	Private sector: 12 weeks; 6 before and 6 after birth. Public sector: 13 weeks; 1 week before and 12 weeks after birth (with the right of anticipating the leave up to 6 weeks before birth). Special conditions apply to select authorized workers and private sector's collective agreements.	Private sector: maternity leave pay takes into account the employee's seniority and the last six months' remunerations. It cannot be lower than the minimum wage and there are no stipulated maximums. Public sector: 100.	10 working days (public sector), 3 working days (private sector); 2 extra days for special collective agreements.
MIDDLE EAST AND NORTH AFRICA			
Israel	26 weeks (14 weeks paid) for women who have worked with the same employer/at the same place of employment for a period of at least 12 months; 14 weeks (7 weeks paid) for women who have worked for a shorter period. Mothers benefit for extended unpaid maternity leave.	100	Father can take part of maternity leave instead of mother, starting from 6 weeks (up to 14 weeks) after birth. If mother splits maternity leave during an extended period of hospitalization, father may take unpaid leave during that time.
Kuwait	Paid pre-delivery sickness leave of unspecified period, 8 weeks paid delivery leave, maternity leave for 16 weeks.	Full pay delivery leave for 8 weeks, full pay maternity leave for 4 weeks and half pay for 12 weeks.	—
Lebanon	7 weeks.	100	—
Oman	Private sector: 7 weeks, public sector: 50 days.	100	—
United Arab Emirates	Public sector: 60 days, private sector: 45 days.	Public sector: 100%. Private sector: 100% (1 year of service), 50% (<1 year of service).	Public sector only, 3 consecutive working days after birth.
NORTH AMERICA			
Canada	15 weeks.	55% (excluding Quebec).	5 weeks for biological fathers (Quebec only).
United States	No federal or state laws mandating maternity leave. However, the federal Family and Medical Leave Act (FMLA) provides for 12 weeks per year of unpaid leave. It is the right of the individual to choose to take FMLA. Some individual states may have laws that set forth broader protections for working mothers than are provided under the FMLA.	No paid leave to new parents. Any wages disbursed to a parent on such leave would be set by the mother's individual employer or a state having a paid leave law. Currently, only 6 states have laws providing paid family leave for employees. Payments are less than the employee's usual salary (e.g. CA: 55%; NJ: around 65%).	No federal or state laws directing or mandating paternity leave.

Note: Blank cells mean that data are not available or not applicable.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Table E1: Maternity, paternity and additional shared leaves (cont'd.)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
Suriname	—	—	—
Uruguay	100	Parental leave is not available. Paid childcare sick leaves are available under various conditions.	Paid childcare sick leaves.
MIDDLE EAST AND NORTH AFRICA			
Israel	100	No parental leave. Parents can take leave from their sick or vacation days if the child is sick.	Paid absence because of child sickness.
Kuwait	—	Mother's leave, minimum 6 months and maximum 3 years.	Unpaid.
Lebanon	—	—	—
Oman	—	After maternity leave, a working mother can take a leave for up to 1 year.	Unpaid.
United Arab Emirates	100, public sector only.	No shared leave, maximum 100-day leave (combined leaves) for mothers (public sector only).	Public sector only: 100% (annual leave, sick leave) and unpaid leave.
NORTH AMERICA			
Canada	—	35 weeks.	Biological Parents: fixed monthly benefit. Slightly higher parental benefits apply to adoptive parents.
United States	No national program; any wages disbursed to a parent on such leave would be set by the father's individual employer or a state having a paid leave law.	The federal Family and Medical Leave Act (FMLA) mandates that employers having at least 50 employees must provide eligible employees with up to 12 weeks per year of unpaid, job-protected leave to care for themselves or the employee's spouse, child, or parent who has a serious medical condition. When available, the leave duration changes from state to state.	—

(Cont'd.)

Appendix E: Policy Frameworks for Gender Equality *(cont'd.)*

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
SUB-SAHARAN AFRICA			
Botswana	12 weeks.	Private sector: 50%, public sector: 100%.	—
Ethiopia	4 weeks before and 8 weeks after birth.	100	5 days after birth.
Ghana	12 weeks. Breastfeeding leaves are available (shorter working hours).	100	—
Lesotho	12 weeks.	100	—
Liberia	12 weeks, of which 1 month before, 2 months after birth.	100	No, but under consideration.
Madagascar	Public sector: 12 weeks, private sector: 14 consecutive weeks, of which 8 weeks after birth.	100	Public sector: 15 days from birth, private sector: 3 days from birth.
Mali	14 weeks: 6 weeks before, 8 weeks after birth.	100	3 days.
Mauritius	Generally 12 weeks.	100	Private sector: 5 continuous working days, public sector: normal casual leave plus up to 8 days leave from accumulated vacation.
Namibia	12 weeks; 4 weeks before and 8 weeks after birth.	100, up to a ceiling.	—
Nigeria	16 weeks.	100	—
Uganda	12 weeks.	100	4 days.
EUROPE AND CENTRAL ASIA			
Albania	5 weeks before, 6 weeks after birth. After 6 weeks of postnatal period, the woman might either work or benefit from social insurance scheme (about 52 weeks).	80% for the prenatal period and 150 days after birth; 50% for the remaining period. The maternity benefit for self-employed women is equal to the basic level of retirement pension.	—
Armenia	140 days (70 days of pregnancy and 70 days after birth).	Employed mothers who are on maternity leave receive monthly child care allowances, before the child reaches the age of 2.	—
Austria	16 weeks: 8 weeks before and 8 weeks after birth.	100	—

Note: Blank cells mean that data are not available or not applicable.

Table E1: Maternity, paternity and additional shared leaves (cont'd.)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
SUB-SAHARAN AFRICA			
Botswana	—	—	—
Ethiopia	Unpaid.	—	—
Ghana	—	—	—
Lesotho	—	2 hours for nursing per day for 6 months (mother only).	Both paid and unpaid.
Liberia	—	No, but there is provision for general annual leave of 1 month.	—
Madagascar	100	Paid leave: 4 weeks per calendar year of actual service.	—
Mali	—	—	—
Mauritius	100	No parental leave provided; however, either parent can take a leave without pay of 9 months.	Unpaid, if there is no more vacation leave left in an individual's bank.
Namibia	—	—	—
Nigeria	—	—	—
Uganda	100	Special leave of absence available.	Paid.
EUROPE AND CENTRAL ASIA			
Albania	—	The employee who has a child up to three years old has the right to paid leave (maximum 15 days/year when the child is sick), as well as to an additional unpaid leave (maximum 30 days/year). Leave is given to the spouse who effectively cares for the child; otherwise it's given to both of them.	—
Armenia	—	Additional leave is provided until the child reaches the age of 3. The leave is provided to the mother, the father, the stepmother, stepfather or to the legal guardian. The husband of the pregnant woman can take an extra non-paid leave, duration of which cannot surpass 2 months.	—
Austria	—	Parental leave. Employees - women and men - are entitled to parental leave until the second birthday of their child, when they are living with the child in the same household.	Childcare allowance: 80% of last income, up to a ceiling. Flat-rate childcare allowance is also provided.

(Cont'd.)

Appendix E: Policy Frameworks for Gender Equality *(cont'd.)*

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
Azerbaijan	10 weeks before, 8 weeks after birth.	100	14 days.
Belgium	Female employees: 15 weeks; at least 1 week before birth (plus 5 optional weeks), at least 9 weeks after birth (plus a maximum 5 optional weeks). Independent female workers: maximum 8 weeks.	Private sector: 82% for first month plus 75% thereafter up to a ceiling. Public sector: statutory civil servants 100%; contracted civil servants, as for private sector.	2 weeks within 4 months after child's birth; not mandatory and not applicable to independent male workers.
Bulgaria	58.6 weeks for pregnancy and childbirth, of which 45 weeks before birth. Breastfeeding maternity leave is also available.	90	15 days.
Croatia	14 weeks; 4 weeks before and 10 weeks after birth.	100	—
Cyprus	18 weeks; minimum 2 weeks and maximum 6 weeks before birth.	75	—
Czech Republic	28 weeks; 6 weeks before birth. Maternal leave cannot be shorter than 14 weeks and cannot be ended earlier than 6 weeks after the birth.	70	—
Denmark	18 weeks; 4 weeks before and 14 weeks after birth. 2 weeks are mandatory.	100% (or maternity leave benefit equivalent to the unemployment benefit rate).	2 weeks within the first 14 weeks after birth.
Estonia	20 weeks; 14 weeks can be taken before birth. Employees who go on pregnancy and maternity leave less than 30 days prior to their due date have their leave reduced by this amount.	100	2 weeks; can be used during the 2 months before or after birth.
Finland	105 working days.	Approximately 70% minimum allowance.	Up to 18 days after birth, taken in up to 4 separate periods; full month of additional paternity leave (daddy month) can be taken by fathers, between 13 and 36 working days (mothers not eligible for maternity or Parental Allowance during daddy month).

Note: Blank cells mean that data are not available or not applicable.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Table E1: Maternity, paternity and additional shared leaves (cont'd.)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
Azerbaijan	Unpaid.	Parental leave for both mothers and fathers until the child reaches the age of 3.	During the first period of parental leave (until the infant reaches the age of 1,5 years old): benefits equal to 2 equivalents of minimum salary; from the age of 1,5 years old until the age of 3 years old: benefits equal to 1 equivalents of minimum salary.
Belgium	100 for the first 3 days, 82 thereafter up to a ceiling.	Parental leave: 3 months of parental leave for each child from the child's birth until s/he is 12 years old. Valid for both parents. Employees that work full-time can take this parental leave on a part-time regime.	Fixed monthly payment.
Bulgaria	90	With the agreement of the mother, when the child is 6 months old insured fathers may use the leave for the rest of the 410 calendar days instead of the mother. For the time during which the father uses this leave, the leave of the mother is discontinued. An additional 6-month unpaid leave is granted for raising a child until completion of 8 years of age.	Cash compensation is provided for parental leave. An additional 6-month unpaid leave is granted for raising a child until completion of 8 years of age.
Croatia	—	Parental leave: 24 weeks for employed or self-employed parent after 6 months of age of the child or meeting other legal requirements. It can be used individually, simultaneously or alternately. If the father uses the right to parental leave for the duration of at least 12 weeks, parental leave is extended for 8 weeks.	80
Cyprus	—	Parental leave: 13 weeks each parent until the child reaches the age of 8. Fathers can use parental leave right after the birth of the child.	Unpaid social security benefits available.
Czech Republic	—	Parental leave for both parents until the child reaches age of 3.	Parental allowance varies according to the length of the period of leave. Care benefits: 60.
Denmark	100 (or paternity leave benefit equivalent to unemployment benefit rate).	32 weeks to each parent.	100% during 10-week parental leave.
Estonia	Paid on the basis of father's average wages, up to a ceiling.	Parental leave: 156,4 weeks until the child reaches the age of 3. One parent at a time.	Different types of parental benefits, including 100% benefit.
Finland	Approximately 70% minimum allowance.	Parental leave can be shared between parents, but both cannot be on parental leave at the same time (with exceptions). Up to 2 separate periods of minimum 12 working days each parent. Parental Allowance covers 158 working days. After parental allowance/extended paternity allowance, parents can take childcare leave with full employment security until the child reaches age 3. Minimum length: 1 month.	Approximately 70%; minimum allowance.

(Cont'd.)

Appendix E: Policy Frameworks for Gender Equality *(cont'd.)*

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
Germany	6 weeks before and 8 weeks after birth. 2 weeks mandatory.	100	—
Greece	17 weeks; 8 weeks before and 9 weeks after birth.	Public sector: 100; private sector: the employer's obligation to pay remuneration during the maternity leave is limited to the payment of remuneration corresponding to 15 days of work (first year service), 1 month work (after first year of service).	Father is entitled to maternity leave if not used by mother.
Iceland	2 weeks, mandatory plus additional 11 weeks.	80, up to a ceiling.	13 weeks.
Ireland	26 weeks paid; up to 16 weeks unpaid.	100% for public sector and certain private sectors.	—
Latvia	112 calendar days: 2 weeks before and 2 weeks after birth mandatory.	80, up to a ceiling.	10 calendar days.
Lithuania	18 weeks; 70 calendar days before, 56 calendar days after birth.	100	4 weeks, from birth until child is 1 month old.
Luxembourg	8 weeks before, 8 weeks after birth.	100	2 days.
Macedonia, FYR	9 months after birth.	100	9 months (if mother does not use leave for birth and parenthood, father or adoptive parent is entitled to leave).
Malta	14 weeks.	100	1-2 days (varies by sector).
Republic of Moldova	70 calendar days before, 56 calendar days after birth.	100	—
Netherlands	16 weeks (10 weeks mandatory); 4 to 6 weeks before, 10 to 12 weeks after birth.	100, up to a ceiling. Self-employees: loss of earnings; maximum: legal minimum wage.	2 days within 4 weeks after birth.
Norway	3 weeks before, 6 weeks after birth.	100	12 weeks after birth for babies born after 1 July 2011 (father's quota).
Portugal	30 days before and 6 weeks after birth.	100	Compulsory period of 10 working days after birth; 5 consecutive days must be taken immediately after birth and 5 days within 30 days of birth; 10 additional working days may be added.
Romania	126 days; at least 42 days mandatory after delivery (confinement).	85% monthly wages in the last 6 months of the 12 months of contribution period, to the limit of 12 gross minimal monthly wages.	5 working days; up to 15 working days in special cases.

Note: Blank cells mean that data are not available or not applicable.

Appendix E: Policy Frameworks for Gender Equality (cont'd.)

Table E1: Maternity, paternity and additional shared leaves (cont'd.)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
Germany	—	Parental leave for both father and mother for a period of 3 years each.	Unpaid. Financial support in the form of parental allowance for a period of 14 months: 67%.
Greece	Paid leave, amount depending on earnings.	Private sector: insured mothers entitled to a special 24-week leave after maternity leave. Public sector: 104-week unpaid leave to mothers at any time before the child completes 6 years of age.	a) Leave to bring up one's child: unpaid, b) Leave to take care of one's child: paid, c) Special provision for the protection of maternity (to which only the mother is entitled), 6 months: minimum wage (social subsidy).
Iceland	Approximately 80, up to a ceiling.	14 weeks.	Unpaid.
Ireland	—	Parental Leave: 14 weeks for both mother and father, to be taken before the child is 8 years.	Parental Leave unpaid.
Latvia	80, up to a ceiling.	Parental leave: 1 year and 1/2 for each parent up to the day the child reaches the age of eight years.	70
Lithuania	100	Granted parental leave until the child reaches age 3.	100% (70%; 40%). Varies according to the chosen duration of the allowance.
Luxembourg	100	Parental leave: 6-month full-time leave or 12-month part-time leave. Family leave and sick leave available.	—
Macedonia, FYR	100	9-month leave allows either the mother or the father to be the beneficiary during the parenthood period.	100
Malta	100	3 months for both parents.	Unpaid.
Republic of Moldova	—	Partially paid parental leave for child care until the child reaches the age of 3; additional unpaid leave to care for children aged 3 to 6 years (mothers, fathers and other caregivers in the family).	30% (until the child reaches 3); unpaid (child aged 3-6).
Netherlands	100, no ceiling.	Parental leave: 26 weeks per parent per child, non-transferable. Emergency and care leaves available.	Parental leave: no statutory payment (dependent on collective agreements).
Norway	100	26 weeks or 36 weeks (depending on the received payment). Can be extended to 47/57 weeks.	Parental leave: 26 weeks with 100% pay or 36 weeks with 80% pay. Up to one year unpaid leave for each child.
Portugal	100	Initial Parental Leave granted to employed mother and father, to be shared. Maximum 120-150 consecutive days, by the parents' joint decision. Extended Parental Leave granted to one or to both parents alternately, maximum 3 months.	Initial Parental Leave: 120 days = 100%; 150 days = 80% (mother only). If the father benefits for initial parental leave as well, the payment increases to 100% and 83%, respectively. Extended Parental Leave: 25%.
Romania	100	Childcare leaves available for either parent until child reaches age 1, 2 or 3 (for special cases).	75%, with specific conditions for maximum and minimum amounts.

(Cont'd.)

Table E1: Maternity, paternity and additional shared leaves by region

Country	Length of maternity leave	Maternity leave benefits (% of wages paid)	Length of paternity leave
Russian Federation	70 calendar days before, 70 calendar days after birth.	100, up to a ceiling.	—
Slovak Republic	34 weeks.	60	—
Slovenia	15 weeks.	100; no lower than 55% of minimum wage in Slovenia.	90 days; 15 days paid, 75 days unpaid.
Spain	16 weeks.	100	2 weeks.
Sweden	2 weeks mandatory leave that can be used before or after confinement. A mother has an optional right to 7-week maternity leave before birth and 7 weeks after birth.	Parental benefit: 80%, up to a ceiling, for the first 390 days. Fixed daily compensation for the remaining 90 days.	10 optional nursing days can be used within 2 months from birth.
Switzerland	Minimum 14 weeks after birth.	80, up to a ceiling.	No statutory paternity leave.
Turkey	16 weeks: 8 weeks before and 8 weeks after birth. The unused leave prior to birth can be added to the postnatal leave period. Breastfeeding leaves available.	100	Public sector only: 10 days.
United Kingdom	2 weeks mandatory after birth. Statutory Maternity Leave is available for 52 weeks.	Statutory Maternity Pay (SMP) paid for up to 39 weeks. 90% for the first 6 weeks followed by the lesser of that 90% rate or a flat rate payment for up to 33 weeks. Maternity Allowance is paid to working women who do not qualify for SMP, up to 39 weeks; 90% (with ceiling).	2 weeks within the first 8 weeks after birth; up to 26 weeks of additional paternity leave if mother returns to work before the end of her 52-week maternity leave period.

Note: Blank cells mean that data are not available or not applicable.

Table E1: Maternity, paternity and additional shared leaves (*cont'd.*)

Country	Paternity leave benefits (% of wages paid)	Additional shared leave (i.e., parental leave)	Additional shared leave benefits (% of wages paid)
Russian Federation	—	Childcare leave available to both mother and father until the child turns 3 years of age.	Child care: 40%.
Slovak Republic	—	Parental leave up to the age of 3.	Monthly Parental Allowance.
Slovenia	100 with a minimum value and a ceiling.	260 days.	Paid parental leave 100%.
Spain	100	10 weeks.	—
Sweden	80, up to a ceiling.	The mother and father are both entitled to 240 optional days of parental benefit (in total, 480 calendar days), of which 60 are reserved to each parent, while the other days can be transferred to the other parent. Other childcare leaves available.	80, up to a ceiling. Collective agreements often provide supplementary pay, raising the payment percentage to 90%.
Switzerland	—	Leave for taking care of a sick child: maximum 3 days.	—
Turkey	—	24 months.	Unpaid.
United Kingdom	90 capped at a flat rate for 2 weeks.	Parental Leave 13 weeks until the child's 5th birthday. Additional Paternity Leave enables the father to take any remaining leave available to the mother after the 20th week of maternity leave as long as she has returned to the workplace.	Additional Paternity Leave: 90% capped at a flat rate.

Appendix E: Policy Frameworks for Gender Equality *(cont'd.)*

Figure E2: Childcare options, global overview
(percentage of respondents)

Notes: Homecare assistance is where one parent stays at home and the other parent is working. Though there are no substantial differences between the 2012 and the 2011 data, one evident difference is in the provision of private daycare assistance services without allowance (19% in 2012, compared to 15% in 2011), which is mainly due to the specific composition of the sample of countries (15 new countries were added as part of the 2012 survey process).

User's Guide: How Country Profiles Work

YASMINA BEKHOUCHE

SAADIA ZAHIDI

World Economic Forum

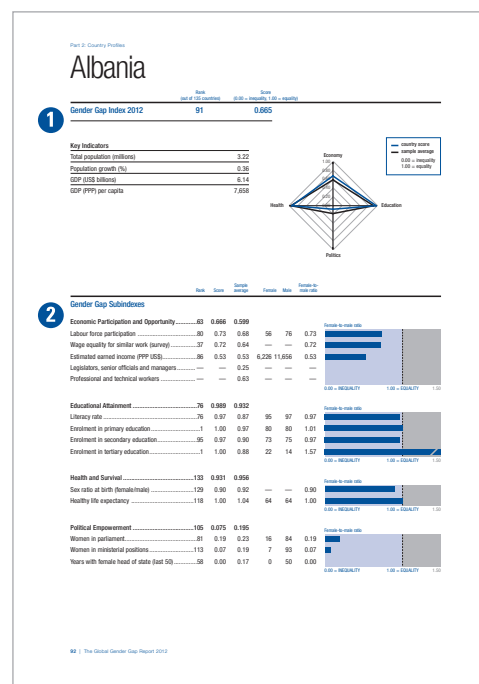

COUNTRY PROFILES: PAGE 1

The first page of each Country Profile displays some key indicators for that country, followed by details of each of the 14 indicators that are used to build the Global Gender Gap Index.

1 KEY INDICATORS

The first section presents the following indicators:

- The Global Gender Gap Index 2012 gives each country's overall performance in closing the gender gap on a 0-to-1 scale and its rank out of 135 reviewed countries.
- Total population (in millions of inhabitants): Source is the World Bank's *World Development Indicators (WDI)* online database (accessed July 2012).
- Population growth (annual percentage): Source is the World Bank's *World Development Indicators (WDI)* online database (accessed June 2012).
- GDP (constant 2000 US\$, in billions of US dollars): Source is the World Bank's *World Development Indicators (WDI)* online database (accessed August 2012).
- GDP per capita PPP (constant 2005 international dollars): Source is the World Bank's *World Development Indicators (WDI)* online database (accessed June 2012).
- The spider chart in the upper right-hand side compares the country's score for each of the four subindexes of *The Global Gender Gap Report 2012* with the average score across all 135 countries. The centre of the chart corresponds to the lowest possible score (0), while the outermost corners of the chart correspond to the highest possible score (1), or equality. Please note that the equality benchmark is 1 for all variables, except sex ratio at birth (0.944) and healthy life expectancy (1.06). Therefore, the equality benchmark of 1 for the health and survival subindex is not strictly accurate.

2 GENDER GAP SUBINDEXES

This section gives an overview of each country's rankings and the scores on the four subindexes of the *Global Gender Gap Report 2012*.

- For each of the variables that enter into the Global Gender Gap Index 2012, column one displays the country's rank, column two displays the score, column three displays the population-weighted sample average (135 countries), column four displays the female value, column five displays the male value and, finally, column six displays the female-to-male ratio. To calculate the Index, all ratios were truncated at the equality benchmark of 1 (for more details, please refer to chapter 1) and thus the highest score possible is 1—except for the sex ratio at birth (0.944) and the healthy life expectancy (1.06). In the case of countries where women surpass men on particular variables, the reader can refer to the exact female and male values as well as the female-to-male ratio to understand the magnitude of the female advantage.

- The bar charts visually display the female-to-male ratio for each of the 14 variables, allowing the reader to see clearly when the female-to-male ratio is above or below the equality benchmark. Values above 1 (the equality benchmark) favour women and values below 1 favour men. Please note that the equality benchmark is 1 for all variables except sex ratio at birth (0.944) and healthy life expectancy (1.06). Therefore, the equality benchmark of 1 in the bar charts for these two variables is not strictly accurate. Finally, in the few cases where the ratio exceeds the scale of the bar chart (which ends at 1.50), the reader should refer to the number under the “female-to-male ratio” column for the actual value.
- The female and male values are displayed without decimals in order to facilitate reading. For example, the values for women in parliament or women in ministerial positions are on a scale of 0 to 100 and the value of the number of years with a female head of state is on a scale of 0 to 50. Due to rounding, data that represent less than six months are displayed as zero. The reader can refer to the female-over-male ratio in order to see the accurate picture.
- For purposes of calculating its index, the UNDP scales downward the female and male values to reflect the maximum values of adult literacy (99%), gross enrolment ratios (100%) and the estimated earned income (40,000) (PPP US\$). The labour force participation rate refers to the 15-to- 64-year-old age bracket.
- The estimated earned income value has been calculated using the methodology of the United Nations Development Programme (UNDP)’s *Human Development Report 2007/2008* (displayed in technical note 1, addendum, p.361). According to the UNDP, because of lack of gender-disaggregated income data, female and male earned income figures are crudely estimated on the basis of data on the ratio of the female non-agricultural wage to the male non-agricultural wage, the female and male percentage share of the economically active population, the total female and male population and the GDP per capita in purchase power parity (PPP) (current international \$). The wage ratios used in this calculation are based on data for the most recent year available. Please note that for the purpose of index calculations, the UNDP scales downward the female and male values to reflect the maximum values of adult literacy (99%), gross enrolment ratios (100%) and the estimated earned income (40,000) (PPP US\$).
- For the “legislators, senior officials and managers” and the “professional and technical workers” variables, we have previously reported Major Group 1 (Totally and Economically Active Population) and Major-Sub Group 1D (Economically Active Population, by occupation and status in employment) from the ILO’s ISCO (88)–International Standard Classification of Occupations. We are now continuing to use Major Group Employment and Major Sub-Group 2C (Total Employment, by occupation) (thousands) in order to remain consistent with the data obtained from the UNDP.
- Estimates for countries that have implemented the International Standard Classification of Occupations (ISCO-88) are not strictly comparable with those for countries using the previous classification (ISCO-68).
- For estimation purposes, a value of 99% literacy rate is used for developed countries. This is because these countries no longer use the traditional measure of literacy, on which the UIS literacy data are used, which is based on the individual or household response to the question “Can you read and write” on a national census or household survey. Many countries are now undertaking “literacy assessments” in order to measure “functional levels of literacy”.
- Data updates are not made in all major international databases annually. The labour force participation, legislators, senior officials and managers and professional and technical workers data have not been fully updated this year. Healthy life expectancy data had also not been revised at the time of Index calculations in 2012.
- The abbreviation “female head of state” is used to describe an elected female head of state or head of government. Some overlap between ministers and heads of states who hold a ministerial position might occur. Egypt’s and Tunisia’s political empowerment data has been repeated from last year in order to view other changes without the added distortion of missing data or complete removal of a country from the Index.

COUNTRY PROFILES: PAGE 2

3 EVOLUTION 2006-2012

The first section of the second page of each Country Profile presents the evolution of that country’s overall performance in the Global Gender Gap Index from 2006 to 2012 (or a shorter period if a country was included after 2006) and in the four subindexes (Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment), measured by changes in rank and score (on a 0-to-1 scale).

Evolution of scores 2006 - 2012

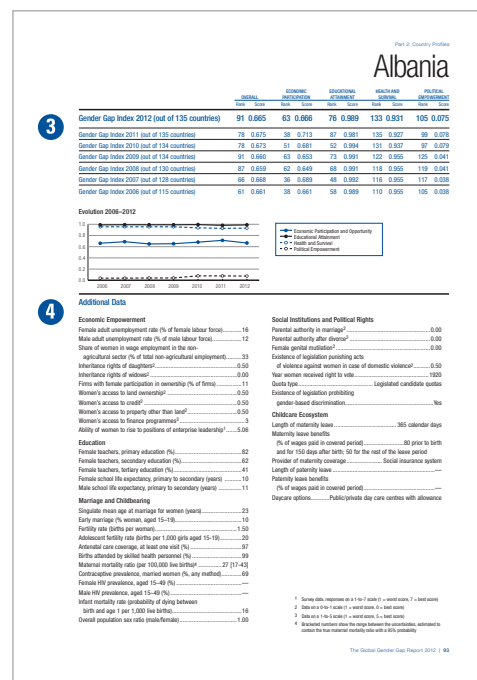

The second section of this page provides a graph depicting the evolution of the country's performance across the overall Gender Gap Index and the four subindexes (on a 0-to-1 scale).

5 ADDITIONAL DATA

The last section compiles a selection of internationally available data that provide a more comprehensive overview of the country's gender gap, and includes social and policy indicators. These data were not used to calculate the Global Gender Gap Index 2012. The indicators in this section are displayed in five broad categories: Economic Empowerment, Education, Marriage and Childbearing, Social Institutions and Political Rights and Childcare Ecosystem.

Economic Empowerment

- Female and male adult unemployment rates (% of female labour force and male labour force, respectively): Source is the World Bank's *World dataBank*, *World Development Indicators* online database, 2010 or latest available data (accessed June 2012).
- Share of women in wage employment in the non-agricultural sector (% of total non-agricultural sector): Source is the United Nations, Department of Economic and Social Affairs, UN Statistics division, *Millennium Development Goals Indicators*, 2010 or latest available data (accessed July 2012).
- Inheritance rights of daughters and widows: Source is the OECD's Gender, Institutions and Development Database 2012 (GID-DB) (accessed July 2012). The numbers are on a 0-to-1 scale, where 1 is the worst possible score and 0 the best possible score.
- Firms with female participation in ownership (% of firms): Source is the World Bank's *World dataBank*, *World Development Indicators* online database, 2010 or latest available data (accessed June 2012).
- Women's access to land ownership, Women's access to credit, Women's access to property other than land: Source of all these variables is the OECD's *Gender, Institutions and Development Database 2012* (GID-DB) (accessed June 2012). The numbers are on a 0-to-1 scale, where 1 is the worst possible score and 0 the best possible score.
- Women's access to finance programmes: Source is the Economist Intelligence Unit, the Women's Economic Opportunity Index (accessed July 2012).

This question assesses three types of programmes:

1) Initiatives to provide financial accounts to women (for example, current accounts, savings accounts and deposit accounts) 2) Outreach efforts aimed at improving women entrepreneurs' access to credit/loans/lines of credit, etc. 3) Provision of financial literacy and/or risk-management programmes to women.

The scoring for this indicator is as follows:

- 1 = None of the three programmes are available.
- 2 = Only one of the three programmes is available, but it is limited in scope (less than 20% of women in the formal sector have access).
- 3 = Two of the three programmes are available, but they are modest in scope (about 50% of women in the formal sector have access) or only one of the three programmes is available, but it is reasonably broad in scope (about 70% of women in the formal sector have access).
- 4 = Two of the three programmes are available, and they are reasonably broad in scope (about 70% of women in the formal sector have access) or women's access to financial services is already very broad, so these programmes are largely unnecessary.
- 5 = All three programmes are available, they are comprehensive in scope or women's access to financial services is already widespread, so these programmes are unnecessary.

The numbers are on a 1-to-5 scale, where 1 is the worst possible score and 5 the best possible score.

- Ability of women to rise to positions of enterprise leadership: Source is the World Economic Forum's

Executive Opinion Survey 2012. Survey question is as follow: “In your country, to what extent do businesses provide women the same opportunities as men to rise to positions of leadership? (1 = not at all, women have no opportunities to rise to positions of leadership; 7 = Extensive, women have equal opportunities of leadership)”.

Education

- Female teachers, primary education (%), Female teachers, secondary education (%) and Female teachers, tertiary education (%): Source of all these variables is the UNESCO, Institute for Statistics' *Education Statistics* online database, 2010 or latest available data (accessed June 2012).
- Female school life expectancy, primary to secondary (years) and Male school life expectancy, primary to secondary (years): Source of these two variable is the UNESCO, Institute of Statistics' *Education Statistics* online database, 2011 or latest available data (accessed June 2012).

Marriage and Childbearing

- Singulate mean age at marriage for women (years): Source is the United Nations, Department of Economic and Social Affairs, UN Statistics Division, 2008 or latest available data (accessed June 2012). The singulate mean age at marriage is an estimate of the average number of years lived in the single state among those who marry before age 50.
- Early marriage (% women, aged 15-19): Source is the OECD's *Gender, Institutions and Development Database 2012* (GID-DB) (accessed June 2012).
- Fertility rate (births per woman): Source is the World Health Organization's *Global Health Observatory, World Health Statistics, Demographic and Socioeconomic Statistics, 2010* (accessed June 2012).
- Adolescent fertility rate (births per 1,000 girls aged 15-19): Source is the World Health Organization's *Global Health Observatory, Health-related Millennium Development Goals, Maternal health, 2010* or latest available data (accessed June 2012).
- Antenatal care coverage – at least one visit (%): Source is the World Health Organization's *Global Health Observatory, Health-related Millennium Development Goals, Maternal Health, 2011* or latest available data (accessed June 2012).

- Births attended by skilled health personnel (%): Source is the World Health Organization's *Global Health Observatory, Health-related Millennium Development Goals, Maternal Health, 2011* or latest available data (accessed June 2012).
- Maternal mortality ratio (per 100,000 live births): Source is the World Health Organization's *Global Health Observatory, Health-related Millennium Development Goals, Maternal Health, 2010* (accessed June 2012).
- Contraceptive prevalence, married women (% any method): Source is the United Nations, Department of Economic and Social Affairs, Statistics Division's *Statistics and Indicators on Women and Men, 2009/2010* or latest available data (accessed June 2012).
- Female HIV prevalence aged 15-49 (%) and Male HIV prevalence, aged 15-49 (%): Source is UNAIDS, unpublished table based on *2010 UNAIDS Report on the Global AIDS Epidemic* (provided by the UNAIDS in September 2011).
- Infant mortality rate (probability of dying between birth and age 1 per 1,000 live births): Source is the World Health Organization's *Global Health Observatory, Health-related Millennium Development Goals, Child Mortality, 2010* (accessed June 2012).
- Overall population sex ratio (male/female): Source is the United Nations, Department of Economic and Social Affairs, UN Statistics Division, 2011 or latest available data (accessed June 2012).

Social Institutions and Political Rights

- Parental authority in marriage, Parental authority after divorce and Female genital mutilation: Source of all these variables is the OECD's *Gender, Institutions and Development Database 2012* (GID-DB) (accessed July 2012). The numbers are on a 0-to-1 scale, where 1 is the worst possible score and 0 the best possible score. Parental authority in marriage refers to legal guardianship of a child during marriage and parental authority after divorce to custody rights over a child after divorce.
- Existence of legislation punishing acts of violence against women in case of domestic violence: Source is the OECD's *Gender, Institutions and Development Database 2012* (GID-DB) (accessed July 2012). The numbers are on a 0-to-1 scale, where 1 is the worst possible score and 0 the best possible score.

- Year women received right to vote: Source is the United Nations Development Programme's *Human Development Report 2009* (accessed May 2011). Data refers to the year in which the right to vote or stand for election on a universal and equal basis was recognised. Where two years are shown, the first refers to the first partial recognition of the right to vote or stand for election.
- Quota type: Source is The International Institute for Democracy and Electoral Assistance, The Stockholm University and The Inter-Parliamentarian Union, quotaProject, Global Database of Quotas for women (accessed in July 2012). (www.quotaproject.org)
- Existence of legislation prohibiting gender-based discrimination: Source is the World Economic Forum's *Survey 2011 and 2012*. Refer to the Appendix for more details.

Childcare Ecosystem

- Length of paid maternity leave, Maternity leave benefits (% of wages paid in covered period) and provider of maternity coverage: Source is the United Nations, Department of Economic and Social Affairs, Statistics Division's *Statistics and Indicators on Women and Men, 2011* (accessed July 2012). The data presented refers to laws and regulations in force at the time of the compilation of the information (between 2004 and 2009). Last update was in December 2011.
- Length of paternity leave, Paternity leave benefits and Day care options: Source of these variables is the World Economic Forum's *Survey 2011 and 2012*. Refer to the Appendix for more details.

Additional Data

Economic Empowerment

Female adult unemployment rate (% of female labour force)	7
Male adult unemployment rate (% of male labour force)	8
Share of women in wage employment in the non-agricultural sector (% of total non-agricultural employment)	50
Inheritance rights of daughters ²	—
Inheritance rights of widows ²	—
Firms with female participation in ownership (% of firms)	—
Women's access to land ownership ²	—
Women's access to credit ²	—
Women's access to property other than land ²	—
Women's access to finance programmes ³	5
Ability of women to rise to positions of enterprise leadership ¹	5.59

Education

Female teachers, primary education (%)	64
Female teachers, secondary education (%)	48
Female teachers, tertiary education (%)	—
Female school life expectancy, primary to secondary (years)	13
Male school life expectancy, primary to secondary (years)	13

Marriage and Childbearing

Singulate mean age at marriage for women (years)	31
Early marriage (% women, aged 15–19)	—
Fertility rate (births per woman)	1.90
Adolescent fertility rate (births per 1,000 girls aged 15–19)	6
Antenatal care coverage, at least one visit (%)	—
Births attended by skilled health personnel (%)	98
Maternal mortality ratio (per 100,000 live births) ⁴	12 [7–23]
Contraceptive prevalence, married women (% any method)	78
Female HIV prevalence, aged 15–49 (%)	0.10
Male HIV prevalence, aged 15–49 (%)	0.30
Infant mortality rate (probability of dying between birth and age 1 per 1,000 live births)	3
Overall population sex ratio (male/female)	0.98

Social Institutions and Political Rights

Parental authority in marriage ²	—
Parental authority after divorce ²	—
Female genital mutilation ²	—
Existence of legislation punishing acts of violence against women in case of domestic violence ²	—
Year women received right to vote	1915
Quota type	No legislated
Existence of legislation prohibiting gender-based discrimination	Yes

Childcare Ecosystem

Length of maternity leave	52 weeks; up to 32 weeks may be divided freely between both parents
Maternity leave benefits	(% of wages paid in covered period) 100, up to ceiling
Provider of maternity coverage	Municipality and employer
Length of paternity leave	2 weeks within first 14 weeks after birth
Paternity leave benefits	(% of wages paid in covered period) 100 (or paternity leave benefit equivalent to unemployment benefit rate)
Daycare options	Public and private daycare with allowance, homecare with allowance

¹ Survey data, responses on a 1-to-7 scale (1 = worst score, 7 = best score)

² Data on a 0-to-1 scale (1 = worst score, 0 = best score)

³ Data on a 1-to-5 scale (1 = worst score, 5 = best score)

⁴ Bracketed numbers show the range between the uncertainties, estimated to contain the true maternal mortality ratio with a 95% probability

Additional Data

Economic Empowerment

Female adult unemployment rate (% of female labour force)	5
Male adult unemployment rate (% of male labour force)	8
Share of women in wage employment in the non-agricultural sector (% of total non-agricultural employment)	55
Inheritance rights of daughters ²	0.50
Inheritance rights of widows ²	0.00
Firms with female participation in ownership (% of firms)	53
Women's access to land ownership ²	0.50
Women's access to credit ²	0.50
Women's access to property other than land ²	0.00
Women's access to finance programmes ³	3
Ability of women to rise to positions of enterprise leadership ¹	4.84

Education

Female teachers, primary education (%)	98
Female teachers, secondary education (%)	77
Female teachers, tertiary education (%)	57
Female school life expectancy, primary to secondary (years)	10
Male school life expectancy, primary to secondary (years)	10

Marriage and Childbearing

Singulate mean age at marriage for women (years)	22
Early marriage (% women, aged 15–19)	11
Fertility rate (births per woman)	1.50
Adolescent fertility rate (births per 1,000 girls aged 15–19)	24
Antenatal care coverage, at least one visit (%)	98
Births attended by skilled health personnel (%)	100
Maternal mortality ratio (per 100,000 live births) ⁴	41 [32–55]
Contraceptive prevalence, married women (% any method)	68
Female HIV prevalence, aged 15–49 (%)	0.40
Male HIV prevalence, aged 15–49 (%)	0.50
Infant mortality rate (probability of dying between birth and age 1 per 1,000 live births)	16
Overall population sex ratio (male/female)	0.90

Social Institutions and Political Rights

Parental authority in marriage ²	0.00
Parental authority after divorce ²	0.00
Female genital mutilation ²	0.00
Existence of legislation punishing acts of violence against women in case of domestic violence ²	0.25
Year women received right to vote	1924, 1993
Quota type	No legislated
Existence of legislation prohibiting gender-based discrimination	Yes

Childcare Ecosystem

Length of maternity leave	126 calendar days
Maternity leave benefits (% of wages paid in covered period)	100
Provider of maternity coverage	Social insurance
Length of paternity leave	—
Paternity leave benefits (% of wages paid in covered period)	—
Daycare options	Public daycare with and without allowance, homecare with and without allowance

Additional Data

Economic Empowerment

Female adult unemployment rate (% of female labour force)	8
Male adult unemployment rate (% of male labour force)	9
Share of women in wage employment in the non-agricultural sector (% of total non-agricultural employment)	50
Inheritance rights of daughters ²	—
Inheritance rights of widows ²	—
Firms with female participation in ownership (% of firms)	—
Women's access to land ownership ²	—
Women's access to credit ²	—
Women's access to property other than land ²	—
Women's access to finance programmes ³	5
Ability of women to rise to positions of enterprise leadership ¹	5.16

Education

Female teachers, primary education (%)	81
Female teachers, secondary education (%)	59
Female teachers, tertiary education (%)	43
Female school life expectancy, primary to secondary (years)	12
Male school life expectancy, primary to secondary (years)	12

Marriage and Childbearing

Singulate mean age at marriage for women (years)	32
Early marriage (% women, aged 15–19)	—
Fertility rate (births per woman)	1.90
Adolescent fertility rate (births per 1,000 girls aged 15–19)	6
Antenatal care coverage, at least one visit (%)	100
Births attended by skilled health personnel (%)	—
Maternal mortality ratio (per 100,000 live births) ⁴	4 [2–7]
Contraceptive prevalence, married women (% any method)	75
Female HIV prevalence, aged 15–49 (%)	0.10
Male HIV prevalence, aged 15–49 (%)	0.20
Infant mortality rate (probability of dying between birth and age 1 per 1,000 live births)	2
Overall population sex ratio (male/female)	0.99

Social Institutions and Political Rights

Parental authority in marriage ²	—
Parental authority after divorce ²	—
Female genital mutilation ²	—
Existence of legislation punishing acts of violence against women in case of domestic violence ²	—
Year women received right to vote	1919, 1921
Quota type	No legislated
Existence of legislation prohibiting gender-based discrimination	Yes

Childcare Ecosystem

Length of maternity leave	480 days shared between both parents; 60 reserved for each parent, the rest freely transferable between both parents (with sole custody, all 480 days accrue to custodial parent)
Maternity leave benefits	(% of wages paid in covered period) 80 for 390 days, up to a ceiling, flat rate for remaining 90 days
Provider of maternity coverage	Social insurance
Length of paternity leave	10 optional nursing days can be used within 2 months from birth
Paternity leave benefits	(% of wages paid in covered period) 80 up to a ceiling
Daycare options	Public and private daycare with allowance, homecare with allowance

¹ Survey data, responses on a 1-to-7 scale (1 = worst score, 7 = best score)

² Data on a 0-to-1 scale (1 = worst score, 0 = best score)

³ Data on a 1-to-5 scale (1 = worst score, 5 = best score)

⁴ Bracketed numbers show the range between the uncertainties, estimated to contain the true maternal mortality ratio with a 95% probability

About the Authors

Ricardo Hausmann is Director of the Center for International Development (CID) and Professor of the Practice of Economic Development at Harvard University and is one of the foremost thinkers on how regions and countries can accelerate growth. His research includes issues of growth, macroeconomic stability, international finance and the social dimensions of development. Professor Hausmann has published widely in leading economic journals and has advised governments in over 80 developing countries on creating effective growth strategies and development policies. He holds a degree in physics and a PhD in economics from Cornell University. Previously, he was Professor of Economics at the Instituto de Estudios Superiores de Administración (IESA) (1985–1991) in Caracas, where he founded the Center for Public Policy. Professor Hausmann served as the first Chief Economist of the Inter-American Development Bank (1994–2000), where he created its Research Department, and served as Minister of Planning of Venezuela (1992–1993) and as a member of the Board of the Central Bank of Venezuela. He also served as Chair of the IMF-World Bank Development Committee. As Director of CID he guides the Center's focus on solving global challenges with breakthrough research at the cutting edge of the hard sciences, social sciences, ethics and politics. Under Professor Hausmann's leadership, CID's Growth Lab has developed innovative theories and their practical applications. Recently, his research team published the *Atlas of Economic Complexity: Mapping Paths to Prosperity*, a new methodology that predicts countries' growth potential by measuring their productive capabilities and know-how. Professor Hausmann developed the methodology of the World Economic Forum Global Gender Gap Index, which looks into areas of health, education, economic participation and political power; he is also the co-author of the annual *Global Gender Gap Report*.

Laura D'Andrea Tyson is the S.K. and Angela Chan Professor of Global Management at the Haas School of Business, at the University of California Berkeley. She served as Dean of London Business School from 2002–2006, and as Dean of the Berkeley Haas School of Business from 1998–2001. Tyson is a member of President Barack Obama's Council of Jobs and Competitiveness and a member of Secretary Hillary Clinton's Foreign Affairs Policy Board. From 2009–2011, she was a member of President Obama's Economic Recovery Advisory Board. She served in the Clinton Administration and was the Chair of the Council of Economic Advisers (1993–1995) and the President's National Economic Adviser (1995–1996).

Tyson is a Senior Advisor at the McKinsey Global Institute, Credit Suisse Research Institute and The Rock Creek Group. She is a Senior Fellow at the Center for American Progress and is on the Advisory Council of the Brookings Institution Hamilton Project. She also serves on the Advisory Board of Newman's Own, Generation Investment Management, H&Q Asia Pacific and Tykoon. Tyson is the chair of the Board of Trustees for the Blum Center for Development Economies and the Bay Area Council Economic Institute. She is an Advisor to Samsung SDS and a Special Advisor at the Berkeley Research Group. She is a Commissioner at the Committee for Responsible Federal Budget and is a member of The MIT Corporation, Committee on Capital Markets Regulation, Henry Jackson Initiative Task Force, Jacobs Foundation Board of Trustees, Think Long Committee for California and 21st Century Council. She is a member of the National Academies' Board on Science, Technology and Economic Policy and a co-chair of the World Economic Forum Global Agenda Council on Women's Empowerment. Tyson serves on the Boards of Directors of Morgan Stanley, AT&T, Silver Spring Networks, CBRE Group Inc. and the Peter G. Peterson Institute of International Economics. Tyson has written books and articles on industrial competitiveness and trade. She has also written opinion columns for many publications, including *Businessweek*, the *New York Times* and the *Financial Times*, and she has made numerous television appearances on economic issues. She is an Economics Editor of Current TV and is on the editorial board of the *International Economy*. She contributes to the *New York Times* Economix blog, Project Syndicate and the *Financial Times* A-list.

Saadia Zahidi is a Senior Director at the World Economic Forum.

Under her leadership, the Women Leaders and Gender Parity Programme aims to benchmark global gender gaps, create awareness of the economic incentives for gender parity and promote collaboration among leaders—women and men—to address gender gaps. Zahidi is co-author and editor of the *Global Gender Gap Report* series since its inception in 2006, co-author and editor of the *Corporate Gender Gap Report*, and responsible for the Forum's initial study in this field, *Women's Empowerment: Measuring the Global Gender Gap*, in 2005. Zahidi frequently serves as an expert and spokesperson in the media and at international conferences on issues of gender parity. She also serves as an advisor on gender gap issues for several institutions, including as a member of the Scientific Advisory Council of the Gender Equality Project, the Women in Public Service Initiative and the *Wall Street Journal*, Women in the Economy Taskforce, among other initiatives. She was previously Head of Constituents at the World Economic Forum, responsible for the engagement of labour leaders, religious leaders, international organizations, NGOs and other civil society actors. She has also been an Economist with the Forum's Global Competitiveness Programme. Her research interests include issues of education, gender, skills, employment and human capital. Zahidi holds a cum laude B.A. degree in Economics from Smith College, Massachusetts, USA and an M.Phil degree in International Economics from the Graduate Institute of International Studies in Geneva, Switzerland. She is currently a candidate for a mid-career Master's in Public Administration at Harvard University's Kennedy School of Government.

Project Team

Yasmina Bekhouche is Project Manager for the Women Leaders and Gender Parity Programme at the World Economic Forum. Her responsibilities include the production of the *Global Gender Gap Report*, which encompasses the production of the Index and co-authoring of the main chapter. She is also responsible for the production of regional studies and organizing community activities at the World Economic Forum's Annual Meetings and regional summits. She previously worked at the Foreign Affairs Division of the Swiss Federal Administration. Bekhouche holds a master's degree in International Relations from the Graduate Institute of International Studies in Geneva, Switzerland. Her interests include social issues, human capital management, diversity and geopolitics.

Annabel Guinault is Team Coordinator for Constituents at the World Economic Forum. Her responsibilities include coordinating among the following communities at the Forum: women leaders, gender parity groups, religious leaders, NGOs and labour leaders. She is also responsible for organising the launch of the *Global Gender Gap Report*. She formerly worked at the Foreign Affairs Division of the Swiss Federal Administration, the International AIDS Society and the Global Benchmarking Network of the World Economic Forum. Guinault holds a master's degree in Advanced European and International Studies from the European Institute in Nice, France. Her interests include sustainable development, health, gender issues and global competitiveness.

Silvia Magnoni is Senior Community Manager for the Women Leaders and Gender Parity Programme at the World Economic Forum, where she coordinates a community of leaders committed to gender equality. Prior to joining the Forum, Silvia worked for Green Center in Denmark, where she delivered research and corporate programs for sustainable development. Previous to this, Silvia held various positions for private companies and international organisations, including Deutsche Bank, the European Central Bank and the Food and Agriculture Organization of the United Nations. Silvia holds an honors degree in Business Economics from LIUC University, Italy and an advanced postgraduate degree in European Studies and Global Affairs from the Postgraduate School of Economics and International Relations in Milan and Pázmány Péter University in Budapest. She is completing a master's program in African Studies at the University of Copenhagen with a focus on gender and environment. Her interests include public policy, corporate accountability and gender mainstreaming.

The World Economic Forum would like to thank Aetna, Alcatel-Lucent, Mumtalakat, Clifford Chance, the Coca-Cola Company, Ernst & Young, HCL Technologies, Heidrick & Struggles, Hubert Burda Media, ManpowerGroup, McKinsey & Company, NYSE Euronext, Nomura, the Olayan Group, Omnicom, Renault-Nissan Alliance and Takeda Pharmaceutical for their invaluable support of the Women Leaders and Gender Parity Programme and this report.

Aetna is a leading diversified healthcare benefits company that serves approximately 36.5 million people around the world with information and resources to help them make better informed healthcare decisions. With a workforce of approximately 33,000, Aetna promotes the use of information technology to improve healthcare delivery and build more effective healthcare systems. An innovative leader in the US healthcare services industry, Aetna applies its expertise globally to collaborate with healthcare systems, government entities and plan sponsors to design locally appropriate solutions to measure and manage wellness, as well as improve health, quality and cost outcomes in Asia, Europe, the Middle East and North America. Aetna's expatriate business is one of the industry's largest international health benefits providers, supporting more than 400,000 members worldwide.

www.aetna.com

Alcatel-Lucent is the long-trusted partner of service providers, enterprises, strategic industries and governments around the world. The company is a leader in mobile, fixed, IP and optics technologies, as well as a pioneer in applications and services. Alcatel-Lucent includes Bell Labs, one of the world's foremost centres of research and innovation in communications technology.

With operations in more than 130 countries and one of the most experienced global services organizations in the industry, Alcatel-Lucent is a local partner with global reach. The company achieved revenues of 16 billion euros in 2010 and is incorporated in France and headquartered in Paris.

www.alcatel-lucent.com

Mumtalakat is the investment company for the Kingdom of Bahrain, established in June 2006 by Royal Decree as an independent holding company for the government of Bahrain's strategic non-oil and gas-related assets. Mumtalakat was created to pursue value-enhancing opportunities, demonstrate transparency and achieve operational excellence for its state-owned non-oil and gas-related assets. Mumtalakat holds stakes in over 35 commercial enterprises spanning a variety of sectors, including aluminium production, financial services, telecommunications, real estate, tourism, transportation and food production.

CLIFFORD CHANCE

An ambition to be the world's premier law firm underpins Clifford Chance's business strategy. The firm aims to achieve this goal through sustained investment in managing knowledge and information and by creating a working culture in all its offices that enables its people to offer consistently high standards of client service.

Combining pragmatism and creativity, Clifford Chance offers practical solutions, a down-to-earth approach to complex cases, in-depth industry knowledge and market-leading expertise to address clients' day-to-day business issues. Clifford Chance builds long-term relationships with clients and is proud of the trust they place in the firm, as it works to develop and implement strategies to take clients' business further.

As one of the world's largest law firms, Clifford Chance embraces responsibilities that extend beyond its clients' work. Through an active programme of pro bono, arts and charitable initiatives, all its people are encouraged to develop strong links with the communities in which they work.

www.cliffordchance.com

The Coca-Cola Company (NYSE: KO) is the world's largest beverage company, refreshing consumers with nearly 500 sparkling and still brands. Along with Coca-Cola, recognized as the world's most valuable brand, the Company's portfolio includes 12 other billion dollar brands, including Diet Coke, Fanta, Sprite, Coca-Cola Zero, vitaminwater, Powerade, Minute Maid, Simply and Georgia Coffee. Globally, the Company is the number one provider of sparkling beverages, juices and juice drinks and ready-to-drink teas and coffees. Through the world's largest beverage distribution system, consumers in more than 200 countries enjoy the Company's beverages at a rate of nearly 1.6 billion servings a day. With an enduring commitment to building sustainable communities, the Company is focused on initiatives that protect the environment, conserve resources and enhance the economic development of the communities where it operates.

www.thecocacola.com

Ernst & Young is a global leader in assurance, tax, transaction and advisory services. Its 152,000 people are united by shared values and a commitment to quality. The company's staff work together to help each other develop and succeed personally and professionally, to help clients deliver on their promises to their markets and stakeholders and to make a difference in the communities in which they live and work.

Created in 1999, the Renault-Nissan Alliance is a unique partnership of five brands that sold 8 million units in 2011 and more than one in 10 cars worldwide. Renault and Nissan employ nearly 350,000 people in almost 200 countries worldwide. Renault and Nissan are run as separate companies but united through cross-shareholding, a shared focus on results-driven synergies, cross-cultural management and respect for individual brand and corporate identities. The Alliance has a flexible business platform and has expanded to include collaborations with Germany's Daimler, China's Dong Feng and Russia's AvtoVAZ, among others. Renault and Nissan are the only automakers mass-producing and selling zero-emission vehicles, including the Nissan LEAF and Renault Kangoo ZE van, which are both 100% electric. The Alliance is helping to build a zero-emission infrastructure around the world and has agreements with over 100 cities, states and countries that are working to establish the infrastructure and market conditions that will help make electric vehicles affordable and convenient.
